MOBILE PRODUCT (EMPLOYEE INQUIRY VISUALIZATION)

Quiri App: Automated Employee Inquiry Answers With Visual Interface on the App Store

A detailed case study on the Quiri App Store listing (id6657983225). Apple's page describes an automated system to respond to employee inquiries with a graphical interface for enhanced visualization. It is listed free, Productivity category, 22.4 MB, iPhone-focused, seller Srinivas Kotamreddy, copyright EasyAsk 2024. Ratings overview was not yet available at capture.

PRODUCT	MARKET	STATUS
Quiri on App Store (id6657983225). Productivity. EasyAsk copyright line.	HR and internal ops teams needing faster employee inquiry responses	Live on Apple App Store; early rating volume at capture

THE STORY IN ONE MINUTE

Employee questions pile up when answers stay buried in tickets and docs

Quiri's App Store copy positions the product as automated responses to employee inquiries with a graphical visualization interface. The case study treats that listing language as the primary public promise and keeps accuracy rates, deflection percentages, and enterprise seat counts out until measured.

EVIDENCE BOUNDARY

Product description, size, category, seller, and privacy "Data Not Collected" declaration come from the App Store page. Inquiry accuracy and HR deflection metrics are not published here.

CLASSIFICATION

Category:	Productivity mobile app for automated employee inquiry responses
Audiences:	HR ops, internal support leads, and AI product buyers
Core promise:	A live iOS client that frames automated employee answers with visual presentation
Live link:	https://apps.apple.com/us/app/quiri/id6657983225

MARKET PROBLEM

Internal Questions Stall When Answers Depend on Manual Triage Alone

Employees ask the same questions repeatedly. The listing frames Quiri as an automated response layer with visualization.

WHERE EMPLOYEE Q&A APPS FAIL

01
Ticket piles
Simple questions wait in queues.

02
Text-only answers
Hard to scan on a phone.

03
No mobile client
Help stays on desktop portals.

04
Opaque AI
Employees do not trust black-box replies.

05
Sparse proof
Buyers need a live install path.

06
Over-claiming
Accuracy % without evaluation sets.

THE EMPLOYEE INQUIRY LOOP

01	02	03	04	05	06
Ask	**Route**	**Answer**	**Visualize**	**Confirm**	**Escalate**
Employee question	Automated system	Generated response	Graphical UI	Employee accepts	Human if needed

PRODUCT PRINCIPLE

Demo the inquiry-to-visual-answer path from the live listing, and keep accuracy claims out until evaluated.

THE BUSINESS CHALLENGE

Automate Answers Without Pretending HR Judgment Is Solved

The app must feel fast and visual for employees while remaining honest that escalation and knowledge quality still matter.

SIX PRODUCT CHALLENGES

01
Inquiry UX
Ask and receive on iPhone.

02
Visualization
Graphical answer presentation.

03
Trust cues
Clear automated vs human.

04
Knowledge scope
What the system can answer.

05
Store presence
Credible App Store listing.

06
Metric honesty
No invented accuracy rates.

TWO AUDIENCES

EMPLOYEES
Get answers faster
Want clear visual responses on mobile.

HR / OPS BUYERS
Evaluate automation
Want a live App Store reference with honest boundaries.

COMMERCIAL MODEL

Listed as Free on the App Store. Enterprise packaging for EasyAsk/Quiri is not detailed on the listing and is not claimed here.

THE PLATFORM SOLUTION

An App Store Client for Visual Employee Answers

Store copy defines the jobs. Portfolio mapping cites React Native / TypeScript patterns for related AI productivity clients.

THE CORE FLOW

01	02	03	04	05	06
Install	**Open**	**Ask**	**Receive**	**View**	**Act**
App Store	Inquiry UI	Employee question	Automated answer	Graphical layout	Done or escalate

CAPABILITIES NAMED IN THE EVIDENCE

01
Automated responses
Employee inquiry answers (listing).

02
Graphical interface
Visualization for answers (listing).

03
iPhone client
Designed for iPhone (store metadata).

04
Productivity category
App Store classification.

05
Privacy posture
Developer declared Data Not Collected.

06
Public listing
id6657983225 install path.

FACTS AT CAPTURE

22.4 MB	Free	4+	EasyAsk
App size at capture	Store price	Age rating	Copyright line 2024

WHAT THE EVIDENCE SHOWS

Count Listing Facts, Separate Unevaluated AI Performance

The listing is short but specific on automation and visualization. Ratings volume was insufficient for an overview at capture.

ELEMENTS COUNTED IN THE PUBLIC SOURCES

2	1	Free	No data collecte	None yet	iPhone
Named jobs	App id	Price	Privacy claim	Ratings overview	Platform focus

OBSERVATIONS

- App Store description is the primary public promise for demos.
- "Data Not Collected" is a developer privacy declaration, not a penetration test.
- Low rating volume means social proof is still forming; do not invent stars.
- AI accuracy must be evaluated separately before sales percentages.

DESIGN PRINCIPLE

Ask one employee-style question on device and show the visual answer layout.

TECHNOLOGY AND ARCHITECTURE

Mobile Delivery Behind an AI Productivity Listing

Apple does not publish the stack. Portfolio mapping cites React Native, TypeScript, Firebase, and Redux patterns.

ARCHITECTURE AS STATED OR IMPLIED

01
iOS client
App Store binary.

02
Inquiry UI
Question entry and history.

03
Answer services
Automated response backend.

04
Visualization layer
Graphical answer presentation.

05
Escalation hooks
Human handoff if present.

06
Release train
App Store Connect.

METHODS AND TOOLS NAMED

React Native | TypeScript | Firebase | Redux | iOS | App Store Connect

CLAIM BOUNDARY

Confirm live stack, model/provider, and knowledge sources before AI architecture claims.

REPORTED RESULTS AND INTENDED VALUE

Intended Faster Answers, Unmeasured Deflection

Public sources support an automated inquiry client. They do not publish deflection rates.

INTENDED VALUE, PER THE EVIDENCE

01
Faster employee answers
Automated response path.

02
Visual clarity
Graphical interface named.

03
Mobile access
iPhone install path.

04
Privacy declaration
Data Not Collected label.

05
Low friction price
Free listing.

06
Demo readiness
Live App Store URL.

USAGE SCENARIOS IMPLIED

- An employee asks a policy question and receives a visualized automated answer.
- An HR buyer installs Quiri from the App Store during evaluation.
- A delivery team walks the inquiry UI and notes escalation boundaries.

CLAIM BOUNDARY

Do not publish accuracy or deflection percentages from this pack.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Surfaces Behind an Employee Inquiry Listing

Mediusware can present the live listing. Authorship needs a scope file.

SURFACES TO ATTRIBUTE

01
Inquiry UI
Ask and history.

02
Answer rendering
Visual presentation.

03
Automation hooks
Response generation entry.

04
Store packaging
Metadata and assets.

05
Privacy posture
Declared data practices.

06
Release path
iOS submit.

DEFENSIBLE PUBLIC PROOF

PROOF
1
Live App Store
id6657983225

PROOF
2
Named jobs
Auto answer + visual

PROOF
Free
Price
Store

PROOF
0
Ratings overview
Insufficient at capture

CONTRIBUTION BOUNDARY

Live listing is public. Staffing and IP are not on the App Store page.

VERIFICATION AND COMPLIANCE

Verify Inquiry Paths Before AI Performance Claims

Automation demos need clear knowledge boundaries.

PRE-PUBLICATION VERIFICATION

01
Install listing
Open id6657983225.

02
Ask one question
Trace automated answer.

03
Inspect visualization
Confirm graphical UI.

04
Read privacy label
Data Not Collected claim.

05
Note rating state
Do not invent social proof.

06
Authorship file
Confirm demo rights.

MEASURES WORTH PUBLISHING

- Median time from question to displayed answer
- Share of answers accepted without escalation
- Crash-free sessions on current release
- Evaluation-set accuracy once a test corpus exists

GOVERNANCE PRIORITY

Publish AI performance only after evaluation sets and written permission.

MEDIUSWARE

Ship AI Productivity Clients With Honest Evidence Boundaries

Quiri App shows how a live App Store listing with clear inquiry jobs beats vague AI slideware.

WHAT THE PROJECT DEMONSTRATES

01
Live store proof
Installable iOS app.

02
Name the jobs
Auto answer + visual.

03
Keep AI honest
No fake accuracy.

04
Privacy labels
Declared practices.

05
Demo readiness
Live URL.

06
Early-stage proof
Listing before ratings scale.

07
Verify on device
One inquiry path.

08
Bound authorship
Scope file required.
