MOBILE PRODUCT (STAFIZ PSA COMPANION)

Stafiz App: Projects, CRM, Staffing, and Expenses on Google Play

A detailed case study on the Stafiz official application (package com.stafiz.stafiz). The Play Store page states users find projects, CRM, staffing, and expenses already used on Stafiz.net, and that an account on Stafiz.net is required. Listing updated 20 Oct 2026 at capture. Developer contacts include support@stafiz.com (DILYNX / Paris).

PRODUCT	MARKET	STATUS
Stafiz on Google Play (com.stafiz.stafiz). Official app of Stafiz software.	Professional services firms using Stafiz for projects, CRM, staffing, and expenses	Live on Google Play; companion requiring Stafiz.net account

THE STORY IN ONE MINUTE

PSA work continues after people leave the desktop

Stafiz already runs as a web PSA-style product. The Android companion exists so users can reach projects, CRM, staffing, and expenses away from a desk. The listing is explicit that a Stafiz.net account is required, which keeps the companion honest as an extension of the web product rather than a standalone ERP.

EVIDENCE BOUNDARY

Feature names (projects, CRM, staffing, expenses), account requirement, and support email come from the Play Store page. Seat pricing and utilization KPIs are not published here. Data-safety form at capture stated no data shared and no data collected.

CLASSIFICATION

Category:	Flutter-oriented Android companion for a PSA / professional services platform
Audiences:	Consultants, staffing managers, and Stafiz administrators
Core promise:	Carry Stafiz projects, CRM, staffing, and expenses on Android with the same account as the web product
Live link:	https://play.google.com/store/apps/details?id=com.stafiz.stafiz&hl;=en

MARKET PROBLEM

Professional Services Break When Mobile Cannot Touch the PSA

Staffing and expenses happen away from desks. The listing frames the app as mobile access to the same Stafiz.net capabilities.

WHERE PSA COMPANIONS FAIL

01
Desktop-only PSA
Field staff cannot update work.

02
Split systems
Mobile notes never reach CRM.

03
Expense lag
Receipts wait until Monday.

04
Staffing blindness
Availability changes off-system.

05
Account confusion
Companion without clear login rules.

06
Over-claiming
Treating companion as full ERP rewrite.

THE STAFIZ COMPANION LOOP

01
Login
Stafiz.net account

02
Projects
Open work

03
CRM
Update relationships

04
Staffing
Availability

05
Expenses
Capture costs

06
Sync
Back to web

PRODUCT PRINCIPLE

Keep the companion explicitly account-linked to Stafiz.net and demo the same objects the web product already owns.

THE BUSINESS CHALLENGE

Mirror Web Capabilities Without Rebuilding Stafiz on a Phone

The app must expose projects, CRM, staffing, and expenses usefully on Android while remaining a companion, not a second product.

SIX PRODUCT CHALLENGES

01
Account gate
Require Stafiz.net login clearly.

02
Object parity
Projects, CRM, staffing, expenses.

03
Mobile density
PSA data on small screens.

04
Sync trust
Updates must land in web.

05
Release stability
Daily professional use.

06
Scope honesty
Companion, not greenfield PSA.

TWO AUDIENCES

STAFIZ USERS
Work away from desk
Want projects, CRM, staffing, expenses on Android.

PSA BUYERS
Evaluate mobile
Want a live official companion listing.

COMMERCIAL MODEL

The listing presents the official Stafiz application and requires a Stafiz.net account. Plan pricing is not on the app page and is not claimed here.

THE PLATFORM SOLUTION

An Official Play Store Companion for Stafiz.net

Store copy defines the mirrored modules. Portfolio mapping for related work cites Flutter/Dart with NestJS-oriented backend patterns.

THE CORE FLOW

01	02	03	04	05	06
Install	**Sign in**	**Projects**	**CRM**	**Expenses**	**Return**
Play Store	Stafiz.net	Open items	Update records	Capture	Web continuity

CAPABILITIES NAMED IN THE EVIDENCE

01 — Projects
Mobile project access (Play Store).

02 — CRM
Customer relationship features (Play Store).

03 — Staffing
Staffing workflows (Play Store).

04 — Expenses
Expense capture (Play Store).

05 — Account requirement
Stafiz.net login required.

06 — Official app
Stated as official Stafiz software app.

FACTS AT CAPTURE

4	**1**	**20 Oct 2026**	**Paris**
Modules named on listing	Account prerequisite	Listing updated	Developer locale on listing

WHAT THE EVIDENCE SHOWS

Count Official Companion Facts, Separate PSA Performance Myths

The listing is concise and explicit. Utilization and margin KPIs are not on the store page.

ELEMENTS COUNTED IN THE PUBLIC SOURCES

4	1	1	1	1	Stafiz.net
Named modules	Package	Account gate	Official label	Support email	Parent web

OBSERVATIONS

- "Create an account on Stafiz.net" is a critical demo script line.
- Data-safety form claimed no third-party sharing and no collection at capture. Reconcile with actual traffic before security claims.
- Flutter/NestJS language is portfolio-mapped unless confirmed.
- Do not treat the companion as proof of full PSA implementation authorship without a scope file.

DESIGN PRINCIPLE

Sign in with a Stafiz.net demo account and update one project or expense on device.

TECHNOLOGY AND ARCHITECTURE

Mobile Delivery Behind an Official PSA Companion

Play does not publish the stack. Portfolio mapping cites Flutter, Dart, Firebase, NestJS, and BLoC/Riverpod patterns.

ARCHITECTURE AS STATED OR IMPLIED

01
Android client
Play package com.stafiz.stafiz.

02
Auth against Stafiz.net
Account-gated access.

03
Projects API
Project objects on mobile.

04
CRM / staffing APIs
Relationship and staffing data.

05
Expenses capture
Cost entry on device.

06
Web sync
Continuity with Stafiz.net.

METHODS AND TOOLS NAMED

Flutter | Dart | Firebase | NestJS | BLoC/Riverpod | Play Store

CLAIM BOUNDARY

Confirm live stack and API contracts before architecture RFPs.

REPORTED RESULTS AND INTENDED VALUE

Intended Mobile Continuity, Unmeasured Utilization Lift

Public sources support mobile access to named Stafiz modules. They do not publish utilization KPIs.

INTENDED VALUE, PER THE EVIDENCE

01
Desk-free access
PSA modules on Android.

02
Same account
Stafiz.net continuity.

03
Expense speed
Capture away from desktop.

04
Staffing visibility
Mobile staffing entry points.

05
Official distribution
Play Store listing.

06
Demo readiness
Live URL for PSA buyers.

USAGE SCENARIOS IMPLIED

- A consultant signs in with Stafiz.net and opens project work on Android.
- A manager captures an expense on the go and sees it in web later.
- A buyer opens the official Play listing during a PSA evaluation.

CLAIM BOUNDARY

Do not publish utilization or margin lifts from this pack.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Surfaces Behind an Official PSA Companion Listing

Mediusware can present the live listing and portfolio patterns. Authorship needs a scope file.

SURFACES TO ATTRIBUTE

01
Auth shell
Stafiz.net login.

02
Projects UX
Mobile project lists.

03
CRM entry points
Relationship updates.

04
Staffing views
Availability workflows.

05
Expenses
Capture and sync.

06
Store release
Play packaging.

DEFENSIBLE PUBLIC PROOF

PROOF
4
Named modules
Play About

PROOF
1
Official app
Listing text

PROOF
1
Account gate
Stafiz.net

PROOF
1
Package
com.stafiz.stafiz

CONTRIBUTION BOUNDARY

Live listing is public. Staffing and IP are not on the Play Store page.

VERIFICATION AND COMPLIANCE

Verify Account-Gated Paths Before PSA Claims

Companion demos need a real Stafiz.net account.

PRE-PUBLICATION VERIFICATION

01
Install listing
com.stafiz.stafiz.

02
Sign in
Valid Stafiz.net account.

03
Open projects
Confirm module access.

04
Capture expense
One cost entry path.

05
Reconcile data safety
Store form vs traffic.

06
Authorship file
Confirm demo rights.

MEASURES WORTH PUBLISHING

- Successful mobile logins against Stafiz.net
- Expenses captured on mobile that appear in web
- Crash-free sessions on current Play release
- Time to first project open after install

GOVERNANCE PRIORITY

Publish PSA performance claims only after device verification and written permission.

MEDIUSWARE

Build PSA Companions That Stay Honest About the Parent Product

Stafiz App shows how an official Play listing with named modules and an account gate beats vague HR-tech screenshots.

WHAT THE PROJECT DEMONSTRATES

01
Ship official listing
Installable Android proof.

02
Name modules
Projects, CRM, staffing, expenses.

03
Account gate
Stafiz.net required.

04
Companion posture
Not a second ERP.

05
Bound metrics
No fake utilization.

06
Flutter posture
Portfolio-mapped delivery.

07
Verify on device
Login + one update.

08
Support path
support@stafiz.com.
