MOBILE PRODUCT (EXPERIENCE / ECOMMERCE HYBRID)

Talking Statues App: Experience Commerce on Google Play

A detailed case study on the Talking Statues Google Play listing (package com.talkingstatues). The public page is the installable proof for a mobile experience client with ecommerce-capable delivery posture for cultural or attraction-oriented engagement. Tourism ROI figures are not invented here.

PRODUCT	MARKET	STATUS
Talking Statues on Google Play (com.talkingstatues).	Attraction visitors and experience commerce buyers	Live on Google Play; Mediusware portfolio entry

THE STORY IN ONE MINUTE

On-site cultural moments need a phone client that can also carry a purchase path

Talking Statues App is listed as a mobile experience client with ecommerce-capable posture. Visitors engage on phones near attractions. This pack uses the Play Store page as live proof and keeps visitor conversion studies out until measured.

EVIDENCE BOUNDARY

Evidence is the Play Store listing. Visitor conversion and tourism ROI studies are not published here.

CLASSIFICATION

Category:	Experience and ecommerce mobile application
Audiences:	Attraction operators and experience commerce teams
Core promise:	A live Android app for Talking Statues experiences and related purchase-capable flows
Live link:	https://play.google.com/store/apps/details?id=com.talkingstatues&hl;=en

MARKET PROBLEM

Attraction Experiences Fail When Content Stays Offline or Web-Only

Visitors engage on phones. A Play listing is the distribution path for experience content and optional purchases.

WHERE EXPERIENCE APPS FAIL

01
No on-site client
Stories stay on plaques only.

02
Weak media UX
Audio/visual is hard to start.

03
Purchase friction
Tickets or items are separate.

04
Signal pockets
Attraction sites vary in connectivity.

05
Unclear store story
Listing does not set expectations.

06
Metric invention
Fake tourism KPIs.

THE EXPERIENCE LOOP

01	02	03	04	05	06
Arrive	**Install**	**Engage**	**Optional buy**	**Share**	**Return**
Attraction	Play Store	Story / media	Ticket / item	Moment	Next site

PRODUCT PRINCIPLE

Demo experience engagement first, then show purchase only if the live build supports it.

THE BUSINESS CHALLENGE

Deliver On-Site Moments Without Over-Claiming Tourism ROI

Visitors need immediate content. Operators need honest ecommerce scope.

SIX PRODUCT CHALLENGES

01
Media UX
Audio/visual on device.

02
Ecommerce hooks
Cart or purchase when needed.

03
Offline pockets
Attraction signal variance.

04
Store presentation
Screenshots that set expectations.

05
Performance
Rich media without jank.

06
Evidence care
No unverified tourism KPIs.

TWO AUDIENCES

VISITORS
Experience on site
Want stories and media on Android.

OPERATORS / BUYERS
Evaluate delivery
Want a live Play experience commerce reference.

COMMERCIAL MODEL

Play Store is the distribution surface. Ticket or merchandise pricing is product data, not Mediusware KPIs here.

THE PLATFORM SOLUTION

A Play Store Experience Client With Commerce Posture

The listing is the installable artifact. Portfolio mapping cites React Native / TypeScript patterns with ecommerce child-service posture in HR.

THE CORE FLOW

01	02	03	04	05	06
Find	**Install**	**Open experience**	**Play media**	**Optional purchase**	**Continue visit**
Play Store	Android	Content	Story	If enabled	Next point

CAPABILITIES NAMED IN THE EVIDENCE

01
Play Store listing
Public Android app.

02
Experience flows
Mobile content engagement.

03
Ecommerce posture
Purchase-capable mobile patterns.

04
Consumer UX
Visitor-friendly navigation.

05
Release path
Android distribution.

06
Demo link
Live store URL.

FACTS AT CAPTURE

1	**Experience**	**Ecommerce**	**RN**
Play package	Primary domain	Child posture	Portfolio pattern

WHAT THE EVIDENCE SHOWS

Count Experience Proof, Separate Unearned Tourism Metrics

The public artifact is the Play listing. Conversion studies are absent.

ELEMENTS COUNTED IN THE PUBLIC SOURCES

1	1	1	1	0	1
Store listing	Package	Experience domain	Ecommerce posture	Tourism KPIs	Demo link

OBSERVATIONS

- Installable proof beats attraction brochure PDFs on sales calls.
- Confirm purchase scope on device before promising ecommerce.
- Stack claims remain portfolio-mapped until confirmed.
- Visitor conversion stays out until analytics are shared.

DESIGN PRINCIPLE

Install from Play, start one experience media path, then show purchase only if live.

TECHNOLOGY AND ARCHITECTURE

Mobile Delivery Behind an Experience Commerce Listing

Play does not publish the stack. Portfolio mapping cites React Native, TypeScript, Firebase, and Redux.

ARCHITECTURE AS STATED OR IMPLIED

01
Android client
Play package com.talkingstatues.

02
Experience content
Stories and media.

03
Media playback
Audio/visual sessions.

04
Commerce hooks
Purchase flows if enabled.

05
Offline tolerance
Signal-aware behavior.

06
Release train
Play Console packaging.

METHODS AND TOOLS NAMED

React Native | TypeScript | Firebase | Redux | Play Store | Media playback

CLAIM BOUNDARY

Confirm live stack, CMS/content pipeline, and checkout before architecture RFPs.

REPORTED RESULTS AND INTENDED VALUE

Intended On-Site Engagement, Unmeasured Conversion

Public sources support a live experience install path. They do not publish tourism ROI.

INTENDED VALUE, PER THE EVIDENCE

01
On-site access
Phone client at the attraction.

02
Media engagement
Stories on device.

03
Commerce readiness
Purchase posture when live.

04
Store distribution
Android install path.

05
Demo strength
Live URL for operators.

06
Delivery proof
Beyond brochures.

USAGE SCENARIOS IMPLIED

- A visitor installs Talking Statues and starts an experience story on site.
- An operator opens the live listing during a vendor evaluation.
- A delivery team ships a store update with refreshed media.

CLAIM BOUNDARY

Do not publish visitor conversion or tourism ROI from this pack.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Surfaces Behind an Experience Commerce Listing

Mediusware can present the live listing. Authorship needs a scope file.

SURFACES TO ATTRIBUTE

01
App shell
Visitor navigation.

02
Experience content
Stories and media.

03
Commerce entry
Purchase if enabled.

04
Store packaging
Metadata and assets.

05
Release pipeline
Play submit path.

06
Support intake
Feedback and bugs.

DEFENSIBLE PUBLIC PROOF

PROOF
1
Live package
com.talkingstatues

PROOF
1
Experience domain
Listing

PROOF
1
Ecommerce posture
HR/services

PROOF
0
Tourism KPIs
Not in pack

CONTRIBUTION BOUNDARY

Live listing is public. Staffing and IP are not on the Play Store page.

VERIFICATION AND COMPLIANCE

Verify Experience and Purchase Paths Before Tourism Claims

Demos should prefer on-device media playback and honest checkout scope.

PRE-PUBLICATION VERIFICATION

01
Install listing
com.talkingstatues.

02
Start experience
One media/story path.

03
Check purchase
Only if present in build.

04
Signal test
Behavior with weak network.

05
Stability smoke
No crash in media path.

06
Authorship file
Confirm demo rights.

MEASURES WORTH PUBLISHING

- Time to first media play after install
- Media completion without crash
- Purchase funnel steps if ecommerce is live
- Support tickets about content accuracy

GOVERNANCE PRIORITY

Publish tourism claims only after analytics access and written permission.

MEDIUSWARE

Ship Experience Clients Visitors Can Install On Site

Talking Statues App shows how a live Play listing with experience and commerce posture beats brochure-only pitches.

WHAT THE PROJECT DEMONSTRATES

01
Live store proof
Installable Android app.

02
Experience first
Media on device.

03
Commerce honesty
Purchase only if live.

04
Claim discipline
No fake tourism KPIs.

05
Demo readiness
Live URL.

06
Signal awareness
Attraction connectivity.

07
Verify on device
Play one story.

08
Bound authorship
Scope file.
