MOBILE PRODUCT (FITNESS COACHING REACT NATIVE APP)

The Wiggle App: Fitness Coaching Client With Transparent React Native Codebase

A detailed case study on The Wiggle App, a fitness coaching mobile product with a public GitHub repository (shaheen2013/wiggle-app) as technical proof. Portfolio notes map React Native, TypeScript, Firebase, Redux, Sentry, and in-app purchase patterns. Store install metrics are not invented here because the primary live technical link is the repository.

PRODUCT	MARKET	STATUS
The Wiggle App (fitness coaching). Technical live link: GitHub repository.	Fitness consumers and buyers evaluating RN fitness delivery	Technical live proof via GitHub; fitness coaching product family

THE STORY IN ONE MINUTE

Fitness apps are easier to trust when buyers can inspect real engineering, not only screenshots

The Wiggle App is positioned as a React Native fitness coaching client. The public GitHub repository is the unusual strength: buyers can review structure, Firebase usage patterns, and quality tooling references. This pack treats the repo as primary technical evidence and keeps subscriber counts and workout completion rates out until measured.

EVIDENCE BOUNDARY

Evidence is the public GitHub repository and Mediusware portfolio stack notes (RN, TypeScript, Firebase, Redux, Sentry, IAP). App Store / Play install badges are not asserted as primary proof in this pack.

CLASSIFICATION

Category:	React Native fitness coaching mobile application
Audiences:	Fitness users, coaching operators, and technical buyers
Core promise:	A fitness coaching client with inspectable React Native delivery evidence
Live link:	https://github.com/shaheen2013/wiggle-app

MARKET PROBLEM

Fitness Products Struggle When Engineering Proof Is Opaque

Many fitness pitches show UI only. Wiggle's public repo lets technical buyers inspect delivery posture.

WHERE FITNESS APPS FAIL

01
Screenshot-only sales
No code or store proof.

02
Habit drop-off
Programs lack structure.

03
Weak messaging
Coach-user communication breaks.

04
IAP surprises
Subscriptions feel unclear.

05
Crash blindness
No quality visibility.

06
Metric invention
Fake retention claims.

THE FITNESS COACHING LOOP

01	02	03	04	05	06
Join	**Program**	**Train**	**Message**	**Subscribe**	**Improve**
Account	Coach plan	Workouts	Coach chat	Paid access	Next cycle

PRODUCT PRINCIPLE

Lead with inspectable RN engineering and one coaching path; keep growth KPIs out until measured.

THE BUSINESS CHALLENGE

Ship Coaching UX With Transparent Engineering Boundaries

Users need programs and messaging. Buyers need stack honesty and IAP clarity.

SIX PRODUCT CHALLENGES

01
RN architecture
Screens, state, navigation.

02
Firebase services
Auth, messaging, analytics.

03
Coach programs
Structured training paths.

04
IAP posture
Subscription edge cases.

05
Quality visibility
Sentry-style crash insight.

06
Evidence care
Repo proof vs growth claims.

TWO AUDIENCES

FITNESS USERS

Train with structure

Want programs, workouts, and coach messaging.

TECHNICAL BUYERS

Inspect delivery

Want a public RN codebase and clear stack.

COMMERCIAL MODEL

In-app purchases are part of the portfolio pattern for this app family. Exact SKUs and prices should be confirmed in the running build. The GitHub repo is technical proof, not a storefront.

THE PLATFORM SOLUTION

A React Native Fitness Client With Public Code Evidence

The repository and portfolio notes define delivery surfaces: RN/TypeScript client, Firebase, Redux, Sentry, and IAP.

THE CORE FLOW

01	02	03	04	05	06
Clone/review	**Auth**	**Program**	**Workout**	**Chat**	**Subscribe**
GitHub proof	Firebase sign-in	Coach path	Session UX	Messaging	IAP if enabled

CAPABILITIES NAMED IN THE EVIDENCE

01
React Native app
TypeScript mobile client.

02
Firebase auth
Signed-in fitness users.

03
Coach programs
Structured training paths.

04
Chat and alerts
Messaging patterns.

05
Subscriptions
Paid access flows.

06
Repo transparency
GitHub technical review.

FACTS AT CAPTURE

1	**RN+TS**	**Firebase**	**Sentry**
Public GitHub repo	Client stack stated	Mobile services	Quality tooling named

WHAT THE EVIDENCE SHOWS

Count Engineering Proof, Separate Unearned Growth Metrics

The public repo is strong technical evidence. Subscriber counts are not in this pack.

ELEMENTS COUNTED IN THE PUBLIC SOURCES

1	6	Sentry	Named	0	Fitness
Public repo	Named stack pillars	Quality tool	IAP posture	Store badge KPIs	Domain

OBSERVATIONS

- GitHub is the primary live technical link for demos with engineering buyers.
- If a store listing exists later, add it as consumer install proof without dropping repo transparency.
- IAP and Firebase product choices should be confirmed in the running app.
- Do not invent workout completion or MRR from this pack.

DESIGN PRINCIPLE

Walk the repo structure, then run one auth-to-workout path on a device build.

TECHNOLOGY AND ARCHITECTURE

React Native Delivery Behind a Fitness Coaching Client

Portfolio and repo evidence point to RN/TypeScript with Firebase, Redux, Sentry, and IAP hooks.

ARCHITECTURE AS STATED OR IMPLIED

01
RN client
TypeScript screens and navigation.

02
Firebase auth
User sessions.

03
Program content
Coach training structures.

04
Messaging
Chat and notification patterns.

05
IAP layer
Subscription access.

06
Observability
Sentry-style crash visibility.

METHODS AND TOOLS NAMED

React Native | TypeScript | Firebase | Redux | Sentry | In-app purchases | GitHub

CLAIM BOUNDARY

Confirm which Firebase products and IAP stores are active in the build under demo.

REPORTED RESULTS AND INTENDED VALUE

Intended Coaching Continuity, Unmeasured Habit Metrics

Public sources support a structured fitness client with transparent engineering. They do not publish retention.

INTENDED VALUE, PER THE EVIDENCE

01
Structured coaching
Programs and workouts.

02
Messaging
Coach-user communication patterns.

03
Paid access posture
Subscription-ready flows.

04
Quality visibility
Crash insight tooling.

05
Technical trust
Public repository.

06
Demo readiness
Code + device walkthrough.

USAGE SCENARIOS IMPLIED

- A technical buyer reviews the GitHub repository structure and dependencies.
- A user signs in and opens a coaching program workout.
- A product owner inspects subscription entry points without inventing conversion rates.

CLAIM BOUNDARY

Do not publish retention, MRR, or workout completion from this pack.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Surfaces Behind a Transparent Fitness Codebase

Mediusware can present the repo and portfolio patterns. Authorship and client ownership still need a scope file.

SURFACES TO ATTRIBUTE

01
RN app shell
Navigation and state.

02
Auth
Firebase sign-in.

03
Programs
Coach training UX.

04
Messaging
Chat patterns.

05
IAP
Subscription gates.

06
Quality
Sentry integration posture.

DEFENSIBLE PUBLIC PROOF

PROOF
1
Public repo
shaheen2013/wiggle-app

PROOF
6
Stack pillars
Portfolio/repo

PROOF
1
Domain
Fitness coaching

PROOF
0
Growth KPIs
Not in pack

CONTRIBUTION BOUNDARY

Public repo is visible. Commercial ownership and staffing mix are not inferred from GitHub alone.

VERIFICATION AND COMPLIANCE

Verify Repo and Device Paths Before Fitness Claims

Technical demos should pair code review with a running build.

PRE-PUBLICATION VERIFICATION

01
Open GitHub
Review structure and README.

02
Run or install build
Device or simulator.

03
Trace auth
Firebase sign-in path.

04
Open one workout
Program session UX.

05
Check IAP gates
Only if enabled in build.

06
Authorship file
Confirm demo rights.

MEASURES WORTH PUBLISHING

- Crash-free sessions with Sentry visibility
- Time from sign-in to first workout start
- Subscription funnel steps completed in test
- Open issues tagged crash vs feature in repo

GOVERNANCE PRIORITY

Publish growth claims only after analytics access and written permission.

MEDIUSWARE

Ship Fitness Clients Buyers Can Inspect and Run

The Wiggle App shows how transparent RN engineering plus a clear coaching path beats screenshot-only fitness pitches.

WHAT THE PROJECT DEMONSTRATES

01
Public code proof
GitHub repository.

02
RN delivery
TypeScript client.

03
Firebase posture
Auth and services.

04
Coaching UX
Programs and workouts.

05
Quality tooling
Sentry visibility.

06
IAP readiness
Subscription patterns.

07
Claim discipline
No fake retention.

08
Verify both ways
Repo + device.
