MOBILE PRODUCT (CONSUMER APP STORE CLIENT)

Yodi App: Consumer Mobile Client on the Apple App Store

A detailed case study on the Yodi App Store listing (id6464098174). The public page is the installable proof for the Yodi consumer mobile client. Usage analytics and growth metrics are not invented in this pack.

PRODUCT	MARKET	STATUS
Yodi on App Store (id6464098174).	Consumer mobile users and product teams evaluating Yodi delivery	Live on Apple App Store; Mediusware portfolio entry

THE STORY IN ONE MINUTE

A consumer product only becomes demable when it has a real install path

Yodi App is the App Store client used as live proof of consumer mobile delivery. This pack documents the store artifact, companion posture, and evidence boundaries for client walkthroughs without inventing engagement KPIs.

EVIDENCE BOUNDARY

Evidence is the App Store listing. DAU, retention, and revenue figures are not published here.

CLASSIFICATION

Category:	Consumer mobile application
Audiences:	Product owners needing a live Yodi iOS reference
Core promise:	A published App Store client for Yodi with disciplined claim boundaries
Live link:	https://apps.apple.com/us/app/yodi/id6464098174

MARKET PROBLEM

Consumer Products Stall Without a Credible Store Presence

Screenshots without an installable listing weaken sales demos. Yodi's App Store page closes that gap.

WHERE CONSUMER APPS FAIL

01
No public install
Buyers cannot try the product.

02
Vague first run
Users do not understand value quickly.

03
Unstable releases
Crashes destroy store trust.

04
Metric invention
Fake growth numbers backfire.

05
Brand mismatch
App feels unrelated to the product story.

06
Weak updates
Stale builds lose users.

THE CONSUMER APP LOOP

01	02	03	04	05	06
Discover	**Install**	**Onboard**	**Use**	**Return**	**Update**
App Store	Device	First value	Core loop	Habit	New release

PRODUCT PRINCIPLE

Lead with the live listing, demonstrate one clear first-run path, and keep engagement metrics out until measured.

THE BUSINESS CHALLENGE

Ship a Credible Client Without Over-Claiming Traction

The app must deliver a clear first session while sales materials stay inside verified store facts.

SIX PRODUCT CHALLENGES

01
First-run clarity
Value in the first minute.

02
Store assets
Honest screenshots and copy.

03
Stability
Crash-free sessions.

04
Release cadence
Ship improvements safely.

05
Claim discipline
No invented DAU.

06
Support path
Feedback intake.

TWO AUDIENCES

END USERS
Get value fast
Want a clear iOS experience.

PRODUCT BUYERS
Evaluate delivery
Want a live App Store reference.

COMMERCIAL MODEL

App Store is the distribution surface. Monetization details are not asserted unless verified on the live listing at demo time.

THE PLATFORM SOLUTION

An App Store Client for the Yodi Product

The listing is the installable artifact. Portfolio mapping cites React Native / TypeScript delivery patterns.

THE CORE FLOW

01	02	03	04	05	06
Find	**Install**	**Onboard**	**Core use**	**Settings**	**Update**
App Store	iOS device	First session	Primary loop	Account controls	New version

CAPABILITIES NAMED IN THE EVIDENCE

01
App Store listing
Public iOS presence.

02
Consumer UX
End-user mobile flows.

03
Mobile client
Store-distributed build.

04
Release packaging
iOS submit path.

05
Demo readiness
Live walkthrough URL.

06
Portfolio proof
Pitch-ready store listing.

FACTS AT CAPTURE

1	**id6464098174**	**iOS**	**RN**
App Store listing	Apple app id	Primary platform	Portfolio pattern

WHAT THE EVIDENCE SHOWS

Count the Listing, Not Imaginary Growth Curves

The public artifact is the store page. Traction metrics are absent from this pack.

ELEMENTS COUNTED IN THE PUBLIC SOURCES

1	1	iOS	0	1	Portfolio
Store listing	App id	Platform	Growth KPIs	Demo link	Parent proof

OBSERVATIONS

- Installable proof beats slideware for consumer app sales calls.
- Stack claims remain portfolio-mapped until confirmed.
- Any IAP or subscription language must be read from the live listing at demo time.
- Engagement percentages must stay out until product analytics are shared.

DESIGN PRINCIPLE

Install from the App Store and complete one first-run value path on device.

TECHNOLOGY AND ARCHITECTURE

Mobile Delivery Behind a Consumer Listing

Apple does not publish the stack. Portfolio mapping cites React Native, TypeScript, Firebase, and Redux.

ARCHITECTURE AS STATED OR IMPLIED

01
iOS client
App Store binary.

02
Auth / session
Signed-in user flows as applicable.

03
Core feature APIs
Product backend integration.

04
Push posture
Notifications if used.

05
Analytics
Product iteration signals.

06
Release train
App Store Connect.

METHODS AND TOOLS NAMED

React Native | TypeScript | Firebase | Redux | iOS | App Store Connect

CLAIM BOUNDARY

Confirm live stack before architecture commitments.

REPORTED RESULTS AND INTENDED VALUE

Intended Consumer Reach, Unmeasured Retention

Public sources support a live install path. They do not publish retention curves.

INTENDED VALUE, PER THE EVIDENCE

01
Public install
App Store distribution.

02
First-run value
Clear consumer path.

03
Demo strength
Live URL for sales.

04
Update path
Iterate on store releases.

05
Brand presence
Searchable listing.

06
Delivery proof
Beyond screenshots.

USAGE SCENARIOS IMPLIED

- A user installs Yodi from the App Store and completes onboarding.
- A buyer opens the live listing during a sales call.
- A delivery team ships a store update with refreshed assets.

CLAIM BOUNDARY

Do not publish DAU, retention, or revenue from this pack.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Surfaces Behind a Consumer Store Listing

Mediusware can present the live listing. Authorship needs a scope file.

SURFACES TO ATTRIBUTE

01
App shell
Navigation and home.

02
Onboarding
First-run path.

03
Core flows
Primary consumer jobs.

04
Store packaging
Metadata and assets.

05
Release pipeline
iOS submit path.

06
Support intake
Feedback and bugs.

DEFENSIBLE PUBLIC PROOF

PROOF
1
Live App Store
id6464098174

PROOF
1
Platform
iOS

PROOF
1
Demo URL
Public

PROOF
0
Growth KPIs
Not in pack

CONTRIBUTION BOUNDARY

Live listing is public. Staffing and IP are not on the App Store page.

VERIFICATION AND COMPLIANCE

Verify the First-Run Path Before Sales Claims

Consumer demos should stay inside verified store facts.

PRE-PUBLICATION VERIFICATION

01
Install listing
Open id6464098174.

02
Trace first run
Complete onboarding value.

03
Check store metadata
Screenshots match product.

04
Stability smoke
No crash in core path.

05
Privacy labels
Read Apple declarations.

06
Authorship file
Confirm demo rights.

MEASURES WORTH PUBLISHING

- Time to first value after install
- Crash-free sessions on current release
- Store conversion from product page to install
- Support tickets in first week after release

GOVERNANCE PRIORITY

Publish traction claims only after analytics access and written permission.

MEDIUSWARE

Ship Consumer Clients Buyers Can Install in the Meeting

Yodi App shows how a live App Store listing and disciplined evidence beat vague consumer mockups.

WHAT THE PROJECT DEMONSTRATES

01
Live store proof
Installable iOS app.

02
First-run clarity
One value path.

03
Claim discipline
No fake growth.

04
Release hygiene
Store updates.

05
Demo readiness
Live URL.

06
Portfolio mapping
Delivery patterns.

07
Verify on device
Smoke the core loop.

08
Bound the story
Listing vs analytics.
