MOBILE PRODUCT (FLUTTER FINTECH WALLET)

Goubba App: Flutter Fintech Wallet on Google Play

A production Flutter wallet app published on Google Play, covering secure storage, payment flows, biometric login, and push alerts with store parity as a delivery goal.

PRODUCT	MARKET	STATUS
Goubba (Play Store listing)	Consumer fintech and wallet users	Live on Google Play; Mediusware Flutter portfolio

THE STORY IN ONE MINUTE

A Flutter wallet built for store-ready payments and secure device storage

Goubba is presented as a fintech Flutter build with secure storage, payment flows, biometric login, and push alerts. The public proof is the Play Store listing plus the Flutter portfolio write-up used for client walkthroughs.

EVIDENCE BOUNDARY

Evidence is the Play Store listing and Mediusware Flutter portfolio notes. Transaction volumes and KYC pass rates are not published in this pack.

CLASSIFICATION

Category: Cross-platform fintech wallet mobile application
Audiences: Consumers and fintech product owners needing a wallet client
Core promise: Secure mobile money flows with Flutter delivery to store
Live link: https://play.google.com/store/apps/details?id=app.goubba.com

MARKET PROBLEM

Why teams need Goubba App

The problems below are read from the product shape of Goubba App and the live store or repository evidence.

WHERE THE MOBILE EXPERIENCE BREAKS

01
Trust on device
Wallets need secure local storage.

02
Payment clarity
Flows must feel safe and short.

03
Biometrics
Login should use device security.

04
Push urgency
Users need timely payment alerts.

05
Store review
Play policies for finance apps.

06
Cross-platform
One codebase for Android delivery.

PRODUCT PRINCIPLE

Ship a store-listed mobile client that matches the parent product's jobs, with claims limited to what the live listing can support.

THE BUSINESS CHALLENGE

Deliver Goubba App as a reliable store product

SIX PRODUCT CHALLENGES

01
Secure storage
Keys and tokens on device.

02
Payment UX
Clear confirmation states.

03
Biometric auth
Fallback when biometrics fail.

04
Push reliability
FCM wiring and copy.

05
Crash hygiene
Store stability for finance.

06
Compliance tone
Copy that matches wallet risk.

COMMERCIAL MODEL

Mediusware delivers mobile engineering for client products, from discovery and UX through store submission and ongoing releases. Pricing depends on scope and is confirmed per engagement.

THE PLATFORM SOLUTION

A store-published mobile client for Goubba App

SIX CAPABILITIES

01
Flutter client
Dart/Flutter app shell.

02
Secure storage
Device-protected secrets.

03
Payments UX
Send and confirm flows.

04
Biometric login
Device auth integration.

05
Push alerts
Event notifications.

06
Play distribution
Public store listing.

LIVE ARTIFACT

WHAT THE EVIDENCE SHOWS

Counting the public proof, and the claims to keep bounded

OBSERVATIONS

Evidence is the Play Store listing and Mediusware Flutter portfolio notes. Transaction volumes and KYC pass rates are not published in this pack. Design principle: report only store-visible or repository-visible facts unless a metric is separately verified.

Public live link	Google Play listing for Goubba.
Stack stated	Flutter, Dart, Firebase, Stripe.
Pattern	Wallet UX with biometric login.
Delivery shape	Store-published Flutter fintech client.

TECHNOLOGY AND ARCHITECTURE

Stack stated for Goubba App

METHODS AND TOOLS NAMED

Flutter | Dart | Firebase | Stripe | Secure Storage | FCM

CLAIM BOUNDARY

These are stated stack choices for delivery and demo mapping. They are not an exhaustive bill of materials for every private submodule.

REPORTED RESULTS AND INTENDED VALUE

What can be shown publicly today

01
Public live link
Google Play listing for Goubba.

02
Stack stated
Flutter, Dart, Firebase, Stripe.

03
Pattern
Wallet UX with biometric login.

04
Delivery shape
Store-published Flutter fintech client.

05
Intended value
Faster demos with a real installable client.

06
Buyer clarity
Separate parent web product from the App listing.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Engineering stages behind a store-ready mobile app

01
Discovery
Users, jobs, and store constraints.

02
UX and flows
Mobile information architecture.

03
Engineering
Client app and API integration.

04
QA
Device checks and regression.

05
Store release
Listing, builds, and submit.

06
Handoff
Notes for ongoing releases.

CONTRIBUTION BOUNDARY

Mediusware contribution is framed as mobile product engineering and store delivery support. Exact team staffing by sprint should be confirmed per engagement record.

VERIFICATION AND COMPLIANCE

Confirm facts before the app is presented beyond the store page

01

Live link

Open the store or repository URL before the call.

02

Parent product

Do not confuse the App listing with the web SaaS.

03

Permissions

Explain location, camera, or biometrics only if used.

04

Privacy

Keep member or financial data claims qualified.

05

Metrics

Publish KPIs only when measured.

06

Updates

Confirm the listing still installs on current OS versions.

MEDIUSWARE

Build store-ready mobile products like Goubba App

This project shows how a live mobile listing, a clear parent-product boundary, and disciplined evidence make a stronger client demo than screenshots alone.

01
Ship a real listing
App Store or Play Store proof.

02
Keep parent separate
SaaS web vs App naming.

03
Use honest stacks
Flutter or React Native as built.

04
Bound the claims
Store facts first.

05
Design for field use
Offline and push when needed.

06
Plan releases
Versioning and store metadata.

07
Support the buyer
Walkthrough from the live link.

08
Stay governable
Privacy and permissions clarity.
