CHROME EXTENSION (IP GEO-LOCATION LOOKUP)

Ip2Location: Precise Geo-Location Lookup for Any IP Address in Chrome

A detailed case study on the Ip2Location Chrome extension (id dijmhdpmneceedgojcfmhaedhficbeek). The store listing states users enter an IP and retrieve country, region, city, postal code, latitude, and longitude. Featured badge at capture, 4.9 from 10 ratings, version 1.0, updated 25 Sep 2024, 307KiB, offered by Sarfaraz. Privacy disclosure: will not collect or use your data. Portfolio Browser Extension tech maps Chrome APIs and REST patterns for lookup tools.

PRODUCT	MARKET	STATUS
Ip2Location on Chrome Web Store (dijmhdpmneceedgojcfmhaedhficbeek). Featured.	Developers, security analysts, and marketers needing quick IP origin insights	Live on Chrome Web Store; Featured badge at capture

THE STORY IN ONE MINUTE

Traffic analysis slows when geo-IP lookup still means leaving the browser for a website form

Ip2Location puts country, region, city, postal code, and coordinates behind a simple IP entry in Chrome. The listing targets developers, security analysts, and marketers who need origin insight without a separate geo tool. Privacy is declared as no data collection. Delivery sits in the Mediusware Browser Extension stack family (JS/TS, Chrome APIs, REST).

EVIDENCE BOUNDARY

Geo fields, audience language, Featured badge, rating, version, and privacy declaration come from the Chrome Web Store page. Accuracy SLAs and database vendor contracts are not published here.

CLASSIFICATION

Category:	Chrome geo-IP developer / analyst utility extension
Audiences:	Developers, security analysts, marketers, and tooling buyers
Core promise:	Enter an IP in Chrome and see structured geo fields without leaving the browser
Live link:	https://chromewebstore.google.com/detail/ip2location/dijmhdpmneceedgojcfmhaedhficbeek

MARKET PROBLEM

Geo-IP Work Breaks When Lookup Lives on Another Website

Analysts copy IPs from logs into external forms. A Featured Chrome utility keeps lookup next to the work.

WHERE GEO-IP TOOLS FAIL

01
Context switch
Leave the browser for a lookup site.

02
Sparse fields
Only country when city is needed.

03
Unclear privacy
Lookup tools that harvest queries.

04
Slow UX
Multi-step forms for one IP.

05
No store trust
Unsigned sideloads.

06
Over-claiming
Fake precision percentages.

THE IP LOOKUP LOOP

01	02	03	04	05	06
Copy	**Paste**	**Lookup**	**Read**	**Act**	**Repeat**
IP from log	Extension UI	Geo API	City / coords	Allow / block	Next IP

PRODUCT PRINCIPLE

Return structured geo fields fast, and keep precision claims inside store wording.

THE BUSINESS CHALLENGE

Deliver Useful Geo Fields Without Claiming Forensic Certainty

Users need city and coordinates quickly. Buyers need privacy clarity and honest accuracy boundaries.

SIX PRODUCT CHALLENGES

01
Simple input
One IP field.

02
Field completeness
Country through coordinates.

03
Privacy posture
No collection declaration.

04
Analyst UX
Readable results.

05
Store trust
Featured listing hygiene.

06
Claim discipline
No invented precision %.

TWO AUDIENCES

ANALYSTS / DEVS
Locate an IP
Want country, city, and coordinates in Chrome.

TOOLING BUYERS
Evaluate delivery
Want a Featured Web Store utility with clear privacy.

COMMERCIAL MODEL

Store page does not detail paid tiers. Treat as a free-listed utility unless in-product pricing is verified. Developer email nsl.sarfaraz@gmail.com on listing.

THE PLATFORM SOLUTION

A Chrome Utility for Structured IP Geo Lookup

Store copy defines the fields. Micro-portfolio Browser Extension delivery includes JavaScript, TypeScript, React, Chrome APIs, Manifest V3, and REST APIs.

THE CORE FLOW

01	02	03	04	05	06
Install	**Open**	**Enter**	**Fetch**	**Read**	**Reuse**
Web Store	Popup	IP address	Geo data	Fields	Next lookup

CAPABILITIES NAMED IN THE EVIDENCE

01
IP input
Any IP address (store).

02
Country / region / city
Named geo fields (store).

03
Postal code
Named on listing.

04
Coordinates
Latitude and longitude (store).

05
In-browser UX
No external form required.

06
Privacy declaration
No collect/use stated.

FACTS AT CAPTURE

4.9	Featured	1.0	307KiB
Rating (10) at capture	Store badge	Version	Size

WHAT THE EVIDENCE SHOWS

Count Named Geo Fields, Separate Database Accuracy Myths

The listing names the returned fields. Provider accuracy studies are not in this pack.

ELEMENTS COUNTED IN THE PUBLIC SOURCES

6	10	1	No collect	1.0	1
Geo fields	Ratings	Featured	Privacy claim	Version	Demo link

OBSERVATIONS

- Featured badge is store metadata, not a Mediusware delivery KPI.
- Privacy declaration is strong for demos; still reconcile with actual network calls.
- Stack is portfolio-mapped for the Browser Extension family.
- Do not invent city-level accuracy percentages.

DESIGN PRINCIPLE

Paste one public IP and walk country through coordinates on device.

TECHNOLOGY AND ARCHITECTURE

Extension Delivery Behind a Geo-IP Utility

Store does not publish the stack. Portfolio maps Chrome APIs, MV3, JS/TS/React, and REST lookup patterns.

ARCHITECTURE AS STATED OR IMPLIED

01
MV3 popup
IP entry and results.

02
Chrome APIs
Extension messaging.

03
Geo lookup API
REST to geo provider.

04
Result rendering
Structured fields.

05
Local-only posture
Per privacy declaration.

06
Store packaging
Web Store release.

METHODS AND TOOLS NAMED

JavaScript | TypeScript | React | Chrome APIs | Manifest V3 | REST APIs | Service Workers

CLAIM BOUNDARY

Confirm live geo provider and caching before architecture claims.

REPORTED RESULTS AND INTENDED VALUE

Intended Faster Insights, Unmeasured Detection Accuracy

Public sources support faster geo lookup. They do not publish match accuracy studies.

INTENDED VALUE, PER THE EVIDENCE

01
In-browser lookup
No external form.

02
Structured fields
City and coordinates.

03
Analyst fit
Security and marketing use.

04
Privacy clarity
No collect declaration.

05
Store trust
Featured listing.

06
Demo readiness
Live Web Store URL.

USAGE SCENARIOS IMPLIED

- A security analyst pastes a suspicious IP and reads city plus coordinates.
- A marketer checks traffic origin for a campaign IP sample.
- A buyer opens the Featured listing during a tooling evaluation.

CLAIM BOUNDARY

Do not publish geo accuracy percentages from this pack.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Surfaces Behind a Featured Geo-IP Listing

Mediusware can present the live listing and portfolio patterns. Authorship needs a scope file.

SURFACES TO ATTRIBUTE

01
Popup UX
IP input and results.

02
Lookup client
REST geo call.

03
Field layout
Country through coords.

04
Privacy posture
No-collect declaration.

05
Store packaging
Icons and listing copy.

06
Release path
Web Store submit.

DEFENSIBLE PUBLIC PROOF

PROOF
4.9
Rating
10 reviews

PROOF
Featured
Badge
Store

PROOF
6
Geo fields
Listing

PROOF
1
Package
dijmhdpmneceedgojcfmhaedhfic

CONTRIBUTION BOUNDARY

Live listing is public. Staffing and IP are not on the store page.

VERIFICATION AND COMPLIANCE

Verify Lookup and Privacy Before Analyst Claims

Geo tools need honest field demos and traffic checks.

PRE-PUBLICATION VERIFICATION

01
Install listing
dijmhdpmneceedgojcfmhaedhficbeek.

02
Lookup one IP
Confirm all named fields.

03
Privacy check
Reconcile no-collect claim.

04
Invalid IP UX
Error handling.

05
Store assets
Screenshots match product.

06
Authorship file
Confirm demo rights.

MEASURES WORTH PUBLISHING

- Median milliseconds per lookup in demo
- Field fill rate for successful lookups
- Crash-free sessions on current version
- Support tickets about wrong city/region

GOVERNANCE PRIORITY

Publish accuracy claims only after provider evaluation and written permission.

MEDIUSWARE

Ship Geo Utilities Analysts Can Install Beside Their Logs

Ip2Location shows how a Featured Chrome listing with clear geo fields and privacy beats external lookup forms.

WHAT THE PROJECT DEMONSTRATES

01
Ship a real listing
Chrome Web Store.

02
Name the fields
Country to coordinates.

03
Privacy clarity
No collect claim.

04
Featured trust
Store badge.

05
MV3 posture
Portfolio stack.

06
Bound accuracy
No fake %.

07
Verify on device
One IP path.

08
Scope file
Authorship.
