CHROME EXTENSION (MOBILE DEVICE SIMULATOR)

Pro Mobile Device Simulator: 290+ Device Profiles for Responsive Testing in Chrome

A detailed case study on Pro Mobile Device Simulator (id nnbchafbiobjldgflhkcdaakpmbchogd), offered by Mediusware. The listing states 290+ pre-configured device profiles, multi-device comparison, custom devices, realistic frames, landscape mode, touch scroll simulation, PNG screenshots, dark/light mode, and zoom controls. At capture: version 1.0.3, updated 28 Aug 2026, 5.0 from 3 ratings, 61.77KiB, privacy: will not collect or use data.

PRODUCT

Pro Mobile Device Simulator on Chrome Web Store (nnbchafbiobjldgflhkcdaakpmbchogd). Offered by Mediusware.

MARKET

Frontend engineers, QA, and designers testing responsive layouts

STATUS

Live on Chrome Web Store; Mediusware-offered listing

THE STORY IN ONE MINUTE

Responsive bugs slip through when device testing means resizing a window by hand

The extension brings 290+ smartphone and tablet profiles into Chrome with frames, multi-device comparison, custom sizes, landscape rotation, touch-like scrolling, and PNG capture. Portfolio notes place it under Browser Extension developer-tools delivery with JS/TS, React, Chrome APIs, and Manifest V3.

EVIDENCE BOUNDARY

Device count, feature list, version, size, rating, Mediusware offer, and no-collect privacy come from the Chrome Web Store page. QA coverage percentages are not published here.

CLASSIFICATION

Category:	Chrome developer-tools device simulator extension
Audiences:	Frontend engineers, QA, designers, and agency delivery teams
Core promise:	Simulate 290+ devices in-browser with frames, comparison, and screenshots
Live link:	https://chromewebstore.google.com/detail/pro-mobile-device-simulat/nnbchafbiobjldgflhkcdaakpmbchogd

MARKET PROBLEM

Responsive QA Fails When Device Labs Stay Physical or Manual

Teams need fast device frames in the browser. The listing frames this simulator as that path.

WHERE DEVICE SIMULATORS FAIL

01
Hand resize
Guessing breakpoints.

02
Few presets
Missing real device sizes.

03
No comparison
Cannot see phones side by side.

04
Flat rectangles
No notch/bezel context.

05
Hard screenshots
Capture is awkward.

06
Metric invention
Fake device coverage claims.

THE SIMULATOR LOOP

01	02	03	04	05	06
Install	**Pick**	**Load**	**Compare**	**Rotate**	**Capture**
Web Store	Device profile	Page URL	Multi-device	Landscape	PNG

PRODUCT PRINCIPLE

Optimize for fast visual QA, and keep device-count claims tied to the store listing.

THE BUSINESS CHALLENGE

Make Device Testing Fast Without Claiming Real Hardware Parity

Engineers need frames and comparison. Buyers need honesty that this is browser simulation, not a physical lab.

SIX PRODUCT CHALLENGES

01
Profile library
290+ devices named.

02
Multi-device view
Side-by-side frames.

03
Custom sizes
Save own dimensions.

04
Touch scroll
Overflow feel.

05
Screenshot
PNG export.

06
Claim discipline
Simulation, not hardware.

TWO AUDIENCES

ENGINEERS / QA
Catch layout bugs
Want device frames, compare, and screenshots in Chrome.

BUYERS
Evaluate delivery
Want a Mediusware-offered live Web Store tool.

COMMERCIAL MODEL

Listed without in-app purchase callouts at capture. Pricing beyond free install is not asserted here. Support: tech.mediusware@gmail.com.

THE PLATFORM SOLUTION

A Mediusware-Offered Chrome Simulator for Responsive Work

Store copy defines the jobs. Micro-portfolio Browser Extension stack includes JavaScript, TypeScript, React, Chrome APIs, Manifest V3, and service workers.

THE CORE FLOW

01	02	03	04	05	06
Install	**Select**	**Preview**	**Compare**	**Rotate**	**Shot**
Web Store	Device	Framed page	Multi frames	Landscape	PNG download

CAPABILITIES NAMED IN THE EVIDENCE

01
290+ profiles
Pre-configured devices (store).

02
Multi-device compare
Side by side (store).

03
Custom devices
Save own sizes (store).

04
Device frames
Bezels, notches, home bars.

05
Screenshot PNG
Download current view.

06
Zoom / themes
Fit screen, dark/light UI.

FACTS AT CAPTURE

290+	5.0	1.0.3	Mediusware
Device profiles claimed	Rating (3) at capture	Version	Store offerer

WHAT THE EVIDENCE SHOWS

Count Simulator Features, Separate Hardware Lab Myths

The listing is concrete on profiles and tools. Physical device parity is not claimed.

ELEMENTS COUNTED IN THE PUBLIC SOURCES

290+	8	3	No collect	1.0.3	Mediusware
Profiles	Feature pillars	Ratings	Privacy	Version	Offerer

OBSERVATIONS

- Mediusware as offerer is strong public delivery association for demos.
- Small rating sample (3) means social proof is early; do not invent volume.
- Privacy no-collect is stated; reconcile with network activity.
- Stack remains portfolio-mapped unless confirmed in source.

DESIGN PRINCIPLE

Load a page in two device frames, rotate one, and capture a PNG.

TECHNOLOGY AND ARCHITECTURE

Extension Delivery Behind a Device Simulator Listing

Portfolio maps JS/TS/React, Chrome APIs, Manifest V3, and service workers for developer-tool extensions.

ARCHITECTURE AS STATED OR IMPLIED

01
MV3 client
Simulator UI shell.

02
Profile catalog
290+ device definitions.

03
Frame rendering
Bezels and notches.

04
Compare layout
Multi-device canvas.

05
Capture pipeline
PNG export.

06
Store release
Web Store packaging.

METHODS AND TOOLS NAMED

JavaScript | TypeScript | React | Chrome APIs | Manifest V3 | Service Workers | Vite/Webpack

CLAIM BOUNDARY

Confirm bundler and profile data source before architecture RFPs.

REPORTED RESULTS AND INTENDED VALUE

Intended Faster Visual QA, Unmeasured Bug Escape Rate

Public sources support faster device preview. They do not publish escaped-bug reductions.

INTENDED VALUE, PER THE EVIDENCE

01
Large profile set
290+ devices named.

02
Compare mode
Catch layout drift.

03
Screenshot proof
PNG for tickets.

04
Custom sizes
Client-specific viewports.

05
Privacy clarity
No collect declaration.

06
Mediusware listing
Direct offerer association.

USAGE SCENARIOS IMPLIED

- A frontend engineer compares iPhone and Android frames before a release.
- A designer captures a PNG for a sticky ticket.
- A buyer opens the Mediusware-offered listing on a call.

CLAIM BOUNDARY

Do not publish QA escape-rate improvements from this pack.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Surfaces Behind a Mediusware Simulator Listing

Live listing and Mediusware offerer line are public. Module authorship still needs a scope file.

SURFACES TO ATTRIBUTE

01
Simulator shell
Controls and canvas.

02
Profile picker
290+ devices.

03
Compare mode
Multi-frame layout.

04
Screenshot
PNG export.

05
Theme/zoom
Long-session UX.

06
Store release
Listing packaging.

DEFENSIBLE PUBLIC PROOF

PROOF
290+
Profiles
Store

PROOF
Mediusware
Offerer
Store

PROOF
5.0
Rating
3 reviews

PROOF
1
Package
nnbchafbiobjldgflhkcdaakpmbc

CONTRIBUTION BOUNDARY

Mediusware offerer is public. Staffing mix is not on the store page.

VERIFICATION AND COMPLIANCE

Verify Frames and Capture Before QA Claims

Demos should show real profiles and a PNG download.

PRE-PUBLICATION VERIFICATION

01
Install listing
nnbchafbiobjldgflhkcdaakpmbchogd.

02
Open two devices
Compare mode.

03
Rotate landscape
One click.

04
Capture PNG
Download works.

05
Privacy check
No-collect claim.

06
Authorship file
Confirm demo rights.

MEASURES WORTH PUBLISHING

- Time to first dual-device compare after install
- PNG capture success rate
- Crash-free sessions on 1.0.3
- Support tickets about wrong viewport sizes

GOVERNANCE PRIORITY

Publish QA impact only after team telemetry and written permission.

MEDIUSWARE

Ship Developer Extensions Teams Keep Beside DevTools

Pro Mobile Device Simulator shows how a Mediusware Chrome listing with 290+ profiles beats hand-resized windows.

WHAT THE PROJECT DEMONSTRATES

01
Ship Mediusware listing
Web Store proof.

02
Name profile scale
290+ devices.

03
Compare + capture
QA workflow.

04
Privacy clarity
No collect.

05
MV3 posture
Portfolio stack.

06
Bound claims
Simulation only.

07
Verify on device
Two frames + PNG.

08
Scope file
Authorship.
