CHROME EXTENSION (SALES CONTACT FINDER)

Success.ai Email Finder: Domain Search, Contact Finder, and CRM Export on the Chrome Web Store

A detailed case study on the Success.ai Email Finder Chrome extension (id ohocbgogaaienfhempmeaaedaphghlom). The store listing states users can discover emails, phone numbers, and profiles from any webpage, run domain search, find specific contacts, build lists, and export to Salesforce, HubSpot, Pipedrive, Zoho, or 70+ CRMs. At capture: version 2.0.0, updated 8 Sep 2026, 5.0 from 10 ratings, 321KiB. Mediusware Browser Extension portfolio tags Chrome APIs, React, and REST APIs for this family.

PRODUCT	MARKET	STATUS
Success.ai - Email Finder on Chrome Web Store (ohocbgogaaienfhempmeaaedaphghlom).	Sales, recruiting, marketing outreach, and journalists needing verified contacts	Live on Chrome Web Store; free monthly credits with paid upgrades named on listing

THE STORY IN ONE MINUTE

Outbound stalls when finding a verified email still means tab-hopping across directories

Success.ai positions the extension as a page-native contact finder. Visit a company site or article, run domain search or name search, get verified or confidence-scored contacts, save to lists, and export into the CRM already in use. Free monthly credits lower the install barrier. Portfolio delivery notes map React, Chrome APIs, and REST backends for this sales-tool extension family.

EVIDENCE BOUNDARY

Feature inventory, CRM export claim, credits model, version, size, and rating come from the Chrome Web Store page. Portfolio tech tags come from the Mediusware Browser Extension micro-portfolio. Pipeline conversion rates are not published here.

CLASSIFICATION

Category:	Chrome MV3 sales / lead-intelligence extension
Audiences:	SDRs, recruiters, marketers, and sales-tool buyers
Core promise:	Find and export contacts from the page you are already on, without leaving Chrome
Live link:	https://chromewebstore.google.com/detail/successai-email-finder/ohocbgogaaienfhempmeaaedaphghlom

MARKET PROBLEM

Contact Discovery Breaks When It Lives Outside the Browser Workflow

Sales and recruiting work happens in tabs. A store-listed finder that runs on the current page closes the gap between research and outreach.

WHERE CONTACT FINDERS FAIL

01
Tab hopping
Directory sites break research flow.

02
Unverified emails
Bounces burn sequences.

03
No list habit
Finds never become a CRM list.

04
Weak CRM export
Copy-paste into Salesforce dies.

05
Paywall on install
Teams never try the product.

06
Metric invention
Fake enrichment accuracy claims.

THE SUCCESS.AI FINDER LOOP

01	02	03	04	05	06
Visit	**Search**	**Verify**	**Save**	**Export**	**Outreach**
Any webpage	Domain or name	Score / check	List builder	70+ CRMs	Sequence

PRODUCT PRINCIPLE

Keep discovery on the page, and keep accuracy language tied to store wording (verified or confidence-scored), not invented match rates.

THE BUSINESS CHALLENGE

Ship Fast Finds Without Pretending Every Email Is Perfect

Users need quick, trustworthy contacts. Buyers need honest credit and CRM boundaries.

SIX PRODUCT CHALLENGES

01
Page context
Work from the current URL.

02
Domain search
Company-wide contact pull.

03
Person search
Name to email/phone.

04
Author detect
Article author contacts.

05
List + CRM
Save and export flows.

06
Credits honesty
Free tier then upgrade.

TWO AUDIENCES

SELLERS / RECRUITERS

Find contacts fast

Want domain search, verified contacts, and CRM export in Chrome.

PRODUCT BUYERS

Evaluate delivery

Want a live Web Store listing with React/Chrome API delivery evidence.

COMMERCIAL MODEL

Listing names free monthly credits and easy upgrades. Exact credit packs and seat pricing are not asserted here; confirm in-product at demo time. Developer: Success AI LLC (Sheridan, WY) on the store page.

THE PLATFORM SOLUTION

A Chrome Web Store Finder Wired to CRM Export

Store copy defines the jobs. Micro-portfolio tech for Browser Extension delivery includes JavaScript, TypeScript, React, Chrome APIs, Manifest V3, REST APIs, NestJS, and OAuth patterns.

THE CORE FLOW

01	02	03	04	05	06
Install	**Account**	**Browse**	**Find**	**List**	**Export**
Web Store	Free credits	Target page	Domain / person	Save contacts	CRM sync

CAPABILITIES NAMED IN THE EVIDENCE

01
Domain search
Contacts from a company page (store).

02
Contact finder
Name to email/phone (store).

03
Author detect
Article author contacts (store).

04
List building
Save with + icon (store).

05
CRM export
Salesforce, HubSpot, Pipedrive, Zoho, 70+ (store).

06
Free credits
Monthly free searches (store).

FACTS AT CAPTURE

5.0	2.0.0	70+	321KiB
Rating (10) at capture	Store version	CRM/apps named	Package size

WHAT THE EVIDENCE SHOWS

Count Store Jobs, Separate Unearned Enrichment Percentages

The listing is concrete on finder jobs and CRM export. Match-rate studies are absent from this pack.

ELEMENTS COUNTED IN THE PUBLIC SOURCES

5	70+	10	2.0.0	2	1
Named jobs	CRM claim	Ratings	Version	Privacy types	Demo link

OBSERVATIONS

- Chrome Web Store About text is the primary feature inventory for demos.
- Privacy disclosure lists personally identifiable and authentication information. Reconcile before security claims.
- React / Chrome APIs / REST tags come from portfolio mapping for this family.
- Do not invent email-valid percentages beyond store wording.

DESIGN PRINCIPLE

Open a company homepage, run domain search, save one contact, and show a CRM export entry point.

TECHNOLOGY AND ARCHITECTURE

Extension Delivery Behind a Sales Finder Listing

The store does not publish the stack. Mediusware Browser Extension micro-portfolio maps JS/TS, React, Chrome APIs, Manifest V3, service workers, REST, NestJS, OAuth, and related backend patterns.

ARCHITECTURE AS STATED OR IMPLIED

01
MV3 client
Popup / content script surfaces.

02
Chrome APIs
Page context and extension messaging.

03
Finder services
Domain and person lookup REST.

04
List storage
Saved contacts before export.

05
CRM connectors
70+ export destinations named.

06
Auth / credits
Account and monthly credit gates.

METHODS AND TOOLS NAMED

JavaScript | TypeScript | React | Chrome APIs | Manifest V3 | Service Workers | REST APIs | NestJS | OAuth | Node.js

CLAIM BOUNDARY

Stack names are portfolio-mapped. Confirm live APIs, enrichment vendors, and OAuth CRM apps before architecture RFPs.

REPORTED RESULTS AND INTENDED VALUE

Intended Faster Outreach, Unmeasured Reply Rates

Public sources support faster contact discovery. They do not publish reply or meeting rates.

INTENDED VALUE, PER THE EVIDENCE

01
On-page discovery
Find without leaving the tab.

02
Domain coverage
Company-wide contact pull.

03
CRM continuity
Export into tools already used.

04
Low friction try
Free monthly credits.

05
Multi-persona fit
Sales, recruiting, marketing, press.

06
Store distribution
Chrome Web Store install path.

USAGE SCENARIOS IMPLIED

- An SDR opens a prospect homepage, runs domain search, and exports contacts to HubSpot.
- A recruiter finds an author email from a blog post via author detect.
- A buyer opens the live Web Store listing during a sales-tool evaluation.

CLAIM BOUNDARY

Do not publish enrichment accuracy or pipeline lift from this pack.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Surfaces Behind a Chrome Sales Finder Listing

Mediusware can present the live store artifact and Browser Extension portfolio patterns. Module authorship still needs a scope file.

SURFACES TO ATTRIBUTE

01
Extension shell
Popup and page actions.

02
Domain search UX
Company contact results.

03
Person finder
Name lookup flows.

04
List builder
Save and organize.

05
CRM export
Connector entry points.

06
Store release
Web Store packaging.

DEFENSIBLE PUBLIC PROOF

PROOF
5.0
Store rating
10 ratings

PROOF
70+
CRM exports
Listing claim

PROOF
1
Live listing
ohocbgogaaienfhempmeaaedaphg

PROOF
2.0.0
Version
8 Sep 2026

CONTRIBUTION BOUNDARY

Live listing is public. Staffing and IP ownership are not on the Chrome Web Store page.

VERIFICATION AND COMPLIANCE

Verify Finder and Export Paths Before Sales Claims

Contact tools affect outreach quality. Demos need real credits and honest verification language.

PRE-PUBLICATION VERIFICATION

01
Install listing
ohocbgogaaienfhempmeaaedaphghlom.

02
Domain search
One company homepage.

03
Person search
One named contact.

04
List save
Add with + control.

05
Export path
Show CRM destination.

06
Authorship file
Confirm demo rights.

MEASURES WORTH PUBLISHING

- Time from page open to first saved contact
- Export success to a test CRM
- Credit consumption per successful find
- Crash-free sessions on current store version

GOVERNANCE PRIORITY

Publish enrichment performance only after evaluation sets and written permission.

MEDIUSWARE

Build Sales Extensions Users Keep Installed Beside Their CRM

Success.ai Email Finder shows how a live Chrome listing with domain search, lists, and CRM export beats directory screenshots.

WHAT THE PROJECT DEMONSTRATES

01
Ship a real listing
Chrome Web Store proof.

02
Name finder jobs
Domain, person, author.

03
CRM export
70+ destinations claimed.

04
Free-to-paid path
Monthly credits.

05
MV3 posture
Portfolio-mapped stack.

06
Bound metrics
No fake match rates.

07
Verify on page
One find + export.

08
Scope file
Authorship before claims.
