MOBILE PRODUCT (FLUTTER FIELD SERVICE)

ServiceBolt App: Field Service Flutter Client on Google Play

A Flutter field-service app on Google Play for technicians who need job boards, GPS dispatch, photo uploads, status updates, and offline-friendly field workflows.

PRODUCT	MARKET	STATUS
ServiceBolt (Play Store listing)	Field service, home services, and construction ops	Live on Google Play; active Mediusware demo project

THE STORY IN ONE MINUTE

Technician work managed on the phone, including offline field use

ServiceBolt App is the Play Store field client described in the Flutter portfolio: job boards, GPS dispatch, photo uploads, status updates, and offline-first patterns for technicians. It pairs with the ServiceBolt web product used by office teams.

EVIDENCE BOUNDARY

Evidence is the Play Store listing and Flutter portfolio description. SLA and utilization KPIs are not published here.

CLASSIFICATION

Category: Field service technician mobile application
Audiences: Service businesses, dispatchers, and technicians
Core promise: Job and dispatch workflows that work in the field
Live link: https://play.google.com/store/apps/details?id=com.servicebolt.app&hl=en

MARKET PROBLEM

Why teams need ServiceBolt App

The problems below are read from the product shape of ServiceBolt App and the live store or repository evidence.

WHERE THE MOBILE EXPERIENCE BREAKS

01
Paper jobs
Technicians lose time on manual updates.

02
Dispatch lag
Office and field are out of sync.

03
Photo proof
Jobs need on-site evidence.

04
Offline sites
Connectivity fails in the field.

05
Customer updates
Status changes need timely sharing.

06
Android fleets
Crews need Play Store installs.

PRODUCT PRINCIPLE

Ship a store-listed mobile client that matches the parent product's jobs, with claims limited to what the live listing can support.

THE BUSINESS CHALLENGE

Deliver ServiceBolt App as a reliable store product

SIX PRODUCT CHALLENGES

01
Offline-first
Queue actions until sync.

02
Geolocation
Dispatch-aware location use.

03
Media uploads
Photos on weak networks.

04
Job board UX
Clear priorities for techs.

05
Crash stability
Daily-driver reliability.

06
Web parity
Align with ServiceBolt office tools.

COMMERCIAL MODEL

Mediusware delivers mobile engineering for client products, from discovery and UX through store submission and ongoing releases. Pricing depends on scope and is confirmed per engagement.

THE PLATFORM SOLUTION

A store-published mobile client for ServiceBolt App

SIX CAPABILITIES

01
Play Store listing
Public Android field app.

02
Job boards
Assigned work lists.

03
GPS dispatch
Location-aware field ops.

04
Photo uploads
On-site job evidence.

05
Status updates
Progress back to the office.

06
Flutter delivery
Cross-platform field client.

WHAT THE EVIDENCE SHOWS

Counting the public proof, and the claims to keep bounded

OBSERVATIONS

Evidence is the Play Store listing and Flutter portfolio description. SLA and utilization KPIs are not published here. Design principle: report only store-visible or repository-visible facts unless a metric is separately verified.

Public live link	Google Play ServiceBolt listing.
Stack stated	Flutter, Dart, Firebase, geolocation.
Industry	Construction / field service.
Delivery shape	Technician Flutter app with offline posture.

TECHNOLOGY AND ARCHITECTURE

Stack stated for ServiceBolt App

METHODS AND TOOLS NAMED

Flutter | Dart | Firebase | Geolocation | Play Store distribution

CLAIM BOUNDARY

These are stated stack choices for delivery and demo mapping. They are not an exhaustive bill of materials for every private submodule.

REPORTED RESULTS AND INTENDED VALUE

What can be shown publicly today

01
Public live link
Google Play ServiceBolt listing.

02
Stack stated
Flutter, Dart, Firebase, geolocation.

03
Industry
Construction / field service.

04
Delivery shape
Technician Flutter app with offline posture.

05
Intended value
Faster demos with a real installable client.

06
Buyer clarity
Separate parent web product from the App listing.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Engineering stages behind a store-ready mobile app

01
Discovery
Users, jobs, and store constraints.

02
UX and flows
Mobile information architecture.

03
Engineering
Client app and API integration.

04
QA
Device checks and regression.

05
Store release
Listing, builds, and submit.

06
Handoff
Notes for ongoing releases.

CONTRIBUTION BOUNDARY

Mediusware contribution is framed as mobile product engineering and store delivery support. Exact team staffing by sprint should be confirmed per engagement record.

VERIFICATION AND COMPLIANCE

Confirm facts before the app is presented beyond the store page

01
Live link
Open the store or repository URL before the call.

02
Parent product
Do not confuse the App listing with the web SaaS.

03
Permissions
Explain location, camera, or biometrics only if used.

04
Privacy
Keep member or financial data claims qualified.

05
Metrics
Publish KPIs only when measured.

06
Updates
Confirm the listing still installs on current OS versions.

MEDIUSWARE

Build store-ready mobile products like ServiceBolt App

This project shows how a live mobile listing, a clear parent-product boundary, and disciplined evidence make a stronger client demo than screenshots alone.

01
Ship a real listing
App Store or Play Store proof.

02
Keep parent separate
SaaS web vs App naming.

03
Use honest stacks
Flutter or React Native as built.

04
Bound the claims
Store facts first.

05
Design for field use
Offline and push when needed.

06
Plan releases
Versioning and store metadata.

07
Support the buyer
Walkthrough from the live link.

08
Stay governable
Privacy and permissions clarity.
