MOBILE PRODUCT (FLUTTER HR / STAFFING)

Stafiz App: Flutter HR Mobile on Google Play

A Flutter HR mobile app on Google Play that extends Stafiz into shift planning, staff availability, and mobile approvals beyond a desktop-only admin console.

PRODUCT	MARKET	STATUS
Stafiz (Play Store listing)	HR teams and staffing operations	Live on Google Play; paired with Stafiz web product

THE STORY IN ONE MINUTE

HR actions for managers and staff who are not at a desk

Stafiz App is framed in the Flutter portfolio as an HR mobile client with shift calendars, messaging hooks, push reminders, and API sync to an admin dashboard. The Play Store listing is the public live artifact.

EVIDENCE BOUNDARY

Evidence is the Play Store listing and Flutter portfolio notes. HR process KPIs are not published here.

CLASSIFICATION

Category: HR and staffing operations mobile application

Audiences: HR managers, team leads, and staffing operators

Core promise: Mobile shift and approval workflows for Stafiz users

Live link: https://play.google.com/store/apps/details?id=com.stafiz.stafiz&hl=en

MARKET PROBLEM

Why teams need Stafiz App

The problems below are read from the product shape of Stafiz App and the live store or repository evidence.

WHERE THE MOBILE EXPERIENCE BREAKS

01
Desktop-only HR
Approvals stall when managers are mobile.

02
Shift chaos
Availability needs a phone UI.

03
Reminders
Missed shifts need push nudges.

04
Sync
Mobile must match admin data.

05
Adoption
Staff will not use clunky apps.

06
Store access
Android distribution for teams.

PRODUCT PRINCIPLE

Ship a store-listed mobile client that matches the parent product's jobs, with claims limited to what the live listing can support.

THE BUSINESS CHALLENGE

Deliver Stafiz App as a reliable store product

SIX PRODUCT CHALLENGES

01
Calendar UX
Shifts readable on small screens.

02
Roles
Manager vs staff permissions.

03
Push copy
Useful reminders only.

04
API sync
Reliable NestJS/backend hooks.

05
Offline tolerance
Graceful weak connectivity.

06
Release quality
Stable Flutter store builds.

COMMERCIAL MODEL

Mediusware delivers mobile engineering for client products, from discovery and UX through store submission and ongoing releases. Pricing depends on scope and is confirmed per engagement.

THE PLATFORM SOLUTION

A store-published mobile client for Stafiz App

SIX CAPABILITIES

01
Play Store listing
Public Android app.

02
Flutter HR client
Shift and approval flows.

03
Push reminders
Mobile notification hooks.

04
Admin sync
Dashboard API alignment.

05
Firebase services
Auth/messaging patterns.

06
Portfolio proof
Flutter HR reference.

WHAT THE EVIDENCE SHOWS

Counting the public proof, and the claims to keep bounded

OBSERVATIONS

Evidence is the Play Store listing and Flutter portfolio notes. HR process KPIs are not published here. Design principle: report only store-visible or repository-visible facts unless a metric is separately verified.

Public live link	Google Play Stafiz listing.
Stack stated	Flutter, Dart, Firebase, NestJS.
Parent product	Stafiz web remains separate.
Delivery shape	Flutter HR companion app.

TECHNOLOGY AND ARCHITECTURE

Stack stated for Stafiz App

METHODS AND TOOLS NAMED

Flutter | Dart | Firebase | NestJS | BLoC/Riverpod patterns | Play Store distribution

CLAIM BOUNDARY

These are stated stack choices for delivery and demo mapping. They are not an exhaustive bill of materials for every private submodule.

REPORTED RESULTS AND INTENDED VALUE

What can be shown publicly today

01
Public live link
Google Play Stafiz listing.

02
Stack stated
Flutter, Dart, Firebase, NestJS.

03
Parent product
Stafiz web remains separate.

04
Delivery shape
Flutter HR companion app.

05
Intended value
Faster demos with a real installable client.

06
Buyer clarity
Separate parent web product from the App listing.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Engineering stages behind a store-ready mobile app

01
Discovery
Users, jobs, and store constraints.

02
UX and flows
Mobile information architecture.

03
Engineering
Client app and API integration.

04
QA
Device checks and regression.

05
Store release
Listing, builds, and submit.

06
Handoff
Notes for ongoing releases.

CONTRIBUTION BOUNDARY

Mediusware contribution is framed as mobile product engineering and store delivery support. Exact team staffing by sprint should be confirmed per engagement record.

VERIFICATION AND COMPLIANCE

Confirm facts before the app is presented beyond the store page

01
Live link
Open the store or repository URL before the call.

02
Parent product
Do not confuse the App listing with the web SaaS.

03
Permissions
Explain location, camera, or biometrics only if used.

04
Privacy
Keep member or financial data claims qualified.

05
Metrics
Publish KPIs only when measured.

06
Updates
Confirm the listing still installs on current OS versions.

MEDIUSWARE

Build store-ready mobile products like Stafiz App

This project shows how a live mobile listing, a clear parent-product boundary, and disciplined evidence make a stronger client demo than screenshots alone.

01
Ship a real listing
App Store or Play Store proof.

02
Keep parent separate
SaaS web vs App naming.

03
Use honest stacks
Flutter or React Native as built.

04
Bound the claims
Store facts first.

05
Design for field use
Offline and push when needed.

06
Plan releases
Versioning and store metadata.

07
Support the buyer
Walkthrough from the live link.

08
Stay governable
Privacy and permissions clarity.
