MOBILE PRODUCT (FIELD SERVICE TIME TRACKING)

Timeero App: Field Time Clock on Google Play

A Google Play time-clock app for field teams, extending Timeero's workforce product into on-site clock-in, job context, and mobile attendance workflows.

PRODUCT	MARKET	STATUS
Timeero Time Clock (Play Store)	Field service, logistics, and construction crews	Live on Google Play; paired with Timeero web product

THE STORY IN ONE MINUTE

Clock-in where the work happens, not only at a desktop

Timeero App is the Play Store client for time tracking. It supports crews who need reliable mobile clocking tied to the broader Timeero operations product used by managers on the web.

EVIDENCE BOUNDARY

Evidence is the Play Store listing and Timeero product context. Payroll accuracy studies are not published here.

CLASSIFICATION

Category: Field workforce time-tracking mobile application

Audiences: Crew leads, field technicians, and operations managers

Core promise: Reliable mobile time clocking for distributed teams

MARKET PROBLEM

Why teams need Timeero App

The problems below are read from the product shape of Timeero App and the live store or repository evidence.

WHERE THE MOBILE EXPERIENCE BREAKS

01
On-site clocking
Desktops are not available in the field.

02
Job context
Time entries need work references.

03
Manager visibility
Web and mobile must stay aligned.

04
Poor connectivity
Sites often have weak signal.

05
Fraud risk
Clock events need trust signals.

06
Store access
Android distribution for crews.

PRODUCT PRINCIPLE

Ship a store-listed mobile client that matches the parent product's jobs, with claims limited to what the live listing can support.

THE BUSINESS CHALLENGE

Deliver Timeero App as a reliable store product

SIX PRODUCT CHALLENGES

01
Simple clock UX
One-thumb clock in/out.

02
Sync
Reliable upload of punches.

03
Permissions
Location only when justified.

04
Battery care
Background work without drain.

05
Role clarity
Worker vs manager views.

06
Release stability
Store builds for daily use.

COMMERCIAL MODEL

Mediusware delivers mobile engineering for client products, from discovery and UX through store submission and ongoing releases. Pricing depends on scope and is confirmed per engagement.

THE PLATFORM SOLUTION

A store-published mobile client for Timeero App

SIX CAPABILITIES

01
Play Store listing
Public Android app.

02
Time clock flows
Clock in and out.

03
Field-first UX
Built for job sites.

04
Product pairing
Aligned with Timeero web.

05
Mobile stack
React Native delivery pattern.

06
Ops continuity
Supports logistics and construction crews.

LIVE ARTIFACT

WHAT THE EVIDENCE SHOWS

Counting the public proof, and the claims to keep bounded

OBSERVATIONS

Evidence is the Play Store listing and Timeero product context. Payroll accuracy studies are not published here. Design principle: report only store-visible or repository-visible facts unless a metric is separately verified.

Public live link	Google Play Timeero time clock listing.
Industry fit	Logistics and construction field work.
Stack stated	React Native, TypeScript, Firebase.
Delivery shape	Workforce mobile companion.

TECHNOLOGY AND ARCHITECTURE

Stack stated for Timeero App

METHODS AND TOOLS NAMED

React Native | TypeScript | Firebase | Redux | Play Store distribution

CLAIM BOUNDARY

These are stated stack choices for delivery and demo mapping. They are not an exhaustive bill of materials for every private submodule.

REPORTED RESULTS AND INTENDED VALUE

What can be shown publicly today

01
Public live link
Google Play Timeero time clock listing.

02
Industry fit
Logistics and construction field work.

03
Stack stated
React Native, TypeScript, Firebase.

04
Delivery shape
Workforce mobile companion.

05
Intended value
Faster demos with a real installable client.

06
Buyer clarity
Separate parent web product from the App listing.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Engineering stages behind a store-ready mobile app

01
Discovery
Users, jobs, and store constraints.

02
UX and flows
Mobile information architecture.

03
Engineering
Client app and API integration.

04
QA
Device checks and regression.

05
Store release
Listing, builds, and submit.

06
Handoff
Notes for ongoing releases.

CONTRIBUTION BOUNDARY

Mediusware contribution is framed as mobile product engineering and store delivery support. Exact team staffing by sprint should be confirmed per engagement record.

VERIFICATION AND COMPLIANCE

Confirm facts before the app is presented beyond the store page

01
Live link
Open the store or repository URL before the call.

02
Parent product
Do not confuse the App listing with the web SaaS.

03
Permissions
Explain location, camera, or biometrics only if used.

04
Privacy
Keep member or financial data claims qualified.

05
Metrics
Publish KPIs only when measured.

06
Updates
Confirm the listing still installs on current OS versions.

MEDIUSWARE

Build store-ready mobile products like Timeero App

This project shows how a live mobile listing, a clear parent-product boundary, and disciplined evidence make a stronger client demo than screenshots alone.

01
Ship a real listing
App Store or Play Store proof.

02
Keep parent separate
SaaS web vs App naming.

03
Use honest stacks
Flutter or React Native as built.

04
Bound the claims
Store facts first.

05
Design for field use
Offline and push when needed.

06
Plan releases
Versioning and store metadata.

07
Support the buyer
Walkthrough from the live link.

08
Stay governable
Privacy and permissions clarity.
