MOBILE PRODUCT (REACT NATIVE FITNESS)

The Wiggle App: React Native Fitness Client

A React Native fitness app with Firebase auth, coach-led programs, streaks, chat, and subscription patterns, documented from the private repository and mobile portfolio notes.

PRODUCT	MARKET	STATUS
Wiggle (GitHub repo / mobile portfolio)	Fitness consumers and coach-led program operators	Portfolio mobile app; repository linked for technical review

THE STORY IN ONE MINUTE

Fitness habits, coaching, and subscriptions in a React Native codebase

The Wiggle App is a TypeScript React Native product covering short workouts, mobility, coach-led programs, streaks, chat, live classes, and subscriptions. Firebase supports auth, analytics, and messaging in the stated stack.

EVIDENCE BOUNDARY

Evidence is the GitHub repository and portfolio stack notes. Download rankings and revenue are not published here.

CLASSIFICATION

Category: Fitness and coaching mobile application

Audiences: Fitness brands and mobile product teams

Core promise: A production-shaped React Native fitness client with Firebase services

MARKET PROBLEM

Why teams need The Wiggle App

The problems below are read from the product shape of The Wiggle App and the live store or repository evidence.

WHERE THE MOBILE EXPERIENCE BREAKS

01
Habit drop-off
Users need short, repeatable workouts.

02
Coaching
Programs need human-led structure.

03
Messaging
Chat and class alerts matter.

04
Subscriptions
Paid access needs careful UX.

05
Auth
Social and email login expectations.

06
Proof for buyers
A repo and stack beat vague claims.

PRODUCT PRINCIPLE

Ship a store-listed mobile client that matches the parent product's jobs, with claims limited to what the live listing can support.

THE BUSINESS CHALLENGE

Deliver The Wiggle App as a reliable store product

SIX PRODUCT CHALLENGES

01
RN architecture
Screens, store, and navigators.

02
Firebase services
Auth, analytics, messaging.

03
Media
Workouts and class content.

04
IAP posture
Subscription edge cases.

05
Quality
Sentry-style crash visibility.

06
Evidence care
Separate code proof from growth claims.

COMMERCIAL MODEL

Mediusware delivers mobile engineering for client products, from discovery and UX through store submission and ongoing releases. Pricing depends on scope and is confirmed per engagement.

THE PLATFORM SOLUTION

A store-published mobile client for The Wiggle App

SIX CAPABILITIES

01
React Native app
TypeScript mobile client.

02
Firebase auth
Signed-in fitness users.

03
Coach programs
Structured training paths.

04
Chat and alerts
Messaging patterns.

05
Subscriptions
Paid access flows.

06
Repo transparency
GitHub technical review.

LIVE ARTIFACT

WHAT THE EVIDENCE SHOWS

Counting the public proof, and the claims to keep bounded

OBSERVATIONS

Evidence is the GitHub repository and portfolio stack notes. Download rankings and revenue are not published here. Design principle: report only store-visible or repository-visible facts unless a metric is separately verified.

Technical live link	GitHub repository for Wiggle.
Stack stated	RN, TypeScript, Firebase, Redux.
Domain	Fitness habit and coaching app.
Delivery shape	Production-oriented RN codebase.

TECHNOLOGY AND ARCHITECTURE

Stack stated for The Wiggle App

METHODS AND TOOLS NAMED

React Native | TypeScript | Firebase | Redux | Sentry | In-app purchases

CLAIM BOUNDARY

These are stated stack choices for delivery and demo mapping. They are not an exhaustive bill of materials for every private submodule.

REPORTED RESULTS AND INTENDED VALUE

What can be shown publicly today

01
Technical live link
GitHub repository for Wiggle.

02
Stack stated
RN, TypeScript, Firebase, Redux.

03
Domain
Fitness habit and coaching app.

04
Delivery shape
Production-oriented RN codebase.

05
Intended value
Faster demos with a real installable client.

06
Buyer clarity
Separate parent web product from the App listing.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Engineering stages behind a store-ready mobile app

01
Discovery
Users, jobs, and store constraints.

02
UX and flows
Mobile information architecture.

03
Engineering
Client app and API integration.

04
QA
Device checks and regression.

05
Store release
Listing, builds, and submit.

06
Handoff
Notes for ongoing releases.

CONTRIBUTION BOUNDARY

Mediusware contribution is framed as mobile product engineering and store delivery support. Exact team staffing by sprint should be confirmed per engagement record.

VERIFICATION AND COMPLIANCE

Confirm facts before the app is presented beyond the store page

01
Live link
Open the store or repository URL before the call.

02
Parent product
Do not confuse the App listing with the web SaaS.

03
Permissions
Explain location, camera, or biometrics only if used.

04
Privacy
Keep member or financial data claims qualified.

05
Metrics
Publish KPIs only when measured.

06
Updates
Confirm the listing still installs on current OS versions.

MEDIUSWARE

Build store-ready mobile products like The Wiggle App

This project shows how a live mobile listing, a clear parent-product boundary, and disciplined evidence make a stronger client demo than screenshots alone.

01
Ship a real listing
App Store or Play Store proof.

02
Keep parent separate
SaaS web vs App naming.

03
Use honest stacks
Flutter or React Native as built.

04
Bound the claims
Store facts first.

05
Design for field use
Offline and push when needed.

06
Plan releases
Versioning and store metadata.

07
Support the buyer
Walkthrough from the live link.

08
Stay governable
Privacy and permissions clarity.
