CHROME EXTENSION (AI TOOLBOX FOR LINKEDIN SALES, MARKETING, HR)

Klevere: LinkedIn-Native AI Toolbox With Bulk Workflows on the Chrome Web Store

A detailed case study on Klevere (id bbogfailgecdbikllcnbdldlkdneolen). A Wayback Machine capture of the Chrome Web Store page (23 Jul 2026) states an AI toolbox for marketing, sales, and HR with LinkedIn-specific tools that can bulk-run: personalized connection requests, ice-breakers, cold emails, prospect research, LinkedIn posts and captions from images, and HR profile fit analysis. At that capture: version 1.1.1, updated 30 Dec 2024, 5.0 from 1 rating, 406KiB, offered by Klevere AI. Mediusware Browser Extension portfolio tags OpenAI API, React, and NestJS for this family.

PRODUCT	MARKET	STATUS
Klevere on Chrome Web Store (bbogfailgecdbikllcnbdldlkdneolen). Evidence from Wayback capture 23 Jul 2026.	Sales, marketing, and HR teams running LinkedIn workflows at scale	Documented from Chrome Web Store archive capture; live listing availability may change

THE STORY IN ONE MINUTE

LinkedIn work stalls when AI drafts and bulk runs still live in separate tabs

Klevere positions a Chrome AI toolbox next to LinkedIn activity. Sales gets connection requests, ice-breakers, cold emails, and prospect research. Marketing gets posts and image captions. HR gets profile-fit analysis. Bulk project runs are named as the scale path. Portfolio delivery maps OpenAI API, React, and NestJS inside the Browser Extension stack (JS/TS, Chrome APIs, Manifest V3).

EVIDENCE BOUNDARY

Feature inventory, version, size, rating, offerer, and privacy (authentication information) come from the Wayback capture of the Chrome Web Store page. Portfolio tech tags come from the Mediusware Browser Extension micro-portfolio. 100X productivity language on the listing is marketing copy, not a measured KPI in this pack. Live store availability should be

CLASSIFICATION

Category: Chrome MV3 AI toolbox extension for LinkedIn workflows

Audiences: Sales, marketing, and recruiting operators; AI extension buyers

Core promise: Run LinkedIn-specific AI tools in bulk from Chrome without leaving the workflow tab

Live link: https://chromewebstore.google.com/detail/klevere/bbogfailgecdbikllcnbdldlkdneolen

MARKET PROBLEM

LinkedIn Execution Breaks When AI Lives Outside the Page

Teams need connection copy, emails, posts, and profile reads next to LinkedIn. The store capture frames Klevere as that toolbox with bulk runs.

WHERE LINKEDIN AI TOOLS FAIL

01
Tab hopping
Drafts live in ChatGPT, not on LinkedIn.

02
One-by-one pain
No bulk project runs.

03
Generic copy
Messages ignore prospect context.

04
Siloed teams
Sales, marketing, HR use different tools.

05
Opaque AI
Unclear what runs where.

06
Metric invention
Fake reply-rate claims.

THE KLEVERE WORKFLOW LOOP

01	02	03	04	05	06
Install	**Open**	**Pick**	**Bulk**	**Review**	**Send**
Web Store	LinkedIn context	AI tool	New project run	Outputs	LinkedIn action

PRODUCT PRINCIPLE

Keep AI tools LinkedIn-native, name bulk projects as the scale path, and keep 100X language attributed to listing marketing.

THE BUSINESS CHALLENGE

Ship Bulk LinkedIn AI Without Over-Claiming Pipeline Results

Users need sales, marketing, and HR tools in one extension. Buyers need honest evidence boundaries on archive vs live store.

SIX PRODUCT CHALLENGES

01
LinkedIn context
Tools next to activity.

02
Sales toolkit
Connect, ice-break, email, research.

03
Marketing toolkit
Posts and image captions.

04
HR toolkit
Profile fit analysis.

05
Bulk projects
Scale named on listing.

06
Claim discipline
No invented reply rates.

TWO AUDIENCES

OPERATORS

Execute faster
Want LinkedIn-native AI tools with bulk runs.

BUYERS

Evaluate delivery
Want store/archive proof plus OpenAI/React/NestJS tags.

COMMERCIAL MODEL

Store capture does not detail seat pricing. Treat monetization as unconfirmed unless verified in-product. Support email support@klevere.ai on the capture.

THE PLATFORM SOLUTION

An AI Toolbox Extension Wired to LinkedIn Workflows

Archive store copy defines the jobs. Micro-portfolio tech includes OpenAI API, React, NestJS, JavaScript, TypeScript, Chrome APIs, and Manifest V3.

THE CORE FLOW

01	02	03	04	05	06
Install	**Open LinkedIn**	**Choose tool**	**Generate**	**Bulk run**	**Act**
Chrome	Context	Sales/Mkt/HR	AI output	Project	On LinkedIn

CAPABILITIES NAMED IN THE EVIDENCE

01
Connection requests
Personalized (store capture).

02
Ice-breakers
Lead openers (store capture).

03
Cold emails
Personalized (store capture).

04
Prospect research
Company research named.

05
LinkedIn posts/captions
Including from images.

06
HR profile analysis
Candidate fit (store capture).

FACTS AT CAPTURE

5.0	**1.1.1**	**406KiB**	**23 Jul 2026**
Rating (1) on capture	Version on capture	Size	Wayback capture

WHAT THE EVIDENCE SHOWS

Count Named AI Jobs, Separate Marketing Multipliers

The capture is concrete on tool categories and bulk runs. 100X language is listing marketing, not a study.

ELEMENTS COUNTED IN THE PUBLIC SOURCES

3	4+	1	1.1.1	Auth	Wayback
Persona pillars	Named sales tools	Rating sample	Version	Privacy type	Evidence source

OBSERVATIONS

- Primary public proof for this pack is the Wayback Chrome Web Store capture. Re-check live listing before customer demos.
- Single rating means social proof is thin; do not invent install volume.
- OpenAI / React / NestJS tags are portfolio-mapped for this extension family.
- Bulk project language is useful for demos; conversion metrics are not on the store page.

DESIGN PRINCIPLE

Show one sales tool generate, then explain bulk project run using listing language only.

TECHNOLOGY AND ARCHITECTURE

Extension Delivery Behind an AI Toolbox Listing

Portfolio maps OpenAI API, React, NestJS, Chrome APIs, and Manifest V3 for AI LinkedIn extensions.

ARCHITECTURE AS STATED OR IMPLIED

01
MV3 client
Popup and LinkedIn content scripts.

02
AI tool UI
Sales, marketing, HR surfaces.

03
OpenAI path
Generation for named tools.

04
Bulk projects
Multi-step workflow runner.

05
Backend APIs
NestJS patterns (portfolio).

06
Store packaging
Web Store / release hygiene.

METHODS AND TOOLS NAMED

JavaScript | TypeScript | React | OpenAI API | NestJS | Chrome APIs | Manifest V3 | Service Workers | OAuth

CLAIM BOUNDARY

Confirm live model provider, LinkedIn ToS posture, and whether the store listing is still public before security or compliance claims.

REPORTED RESULTS AND INTENDED VALUE

Intended Faster LinkedIn Execution, Unmeasured Reply Lift

Public sources support an AI toolbox with bulk runs. They do not publish reply or hire rates.

INTENDED VALUE, PER THE EVIDENCE

01
LinkedIn-native tools
Work beside the feed.

02
Multi-persona coverage
Sales, marketing, HR.

03
Bulk scale
Project runs named.

04
Prospect context
Research and personalization.

05
Portfolio stack
OpenAI + React + NestJS.

06
Demo evidence
Archive store capture.

USAGE SCENARIOS IMPLIED

- An SDR generates a personalized connection request and ice-breaker on a prospect profile.
- A marketer creates a LinkedIn post caption from an uploaded image.
- An HR user analyzes a candidate profile for fit, then bulk-runs a project of similar checks.

CLAIM BOUNDARY

Do not publish 100X or reply-rate claims from this pack. Attribute multiplier language to the store capture only.

MEDIUSWARE CONTRIBUTION AND DELIVERY EVIDENCE

Surfaces Behind a LinkedIn AI Toolbox Listing

Archive listing and portfolio tags are public. Module authorship needs a scope file.

SURFACES TO ATTRIBUTE

01
Extension shell
Tool picker UI.

02
Sales tools
Connect, ice-break, email, research.

03
Marketing tools
Posts and captions.

04
HR tools
Profile fit analysis.

05
Bulk runner
Project execution.

06
Release path
Store packaging.

DEFENSIBLE PUBLIC PROOF

PROOF
5.0
Rating
1 review on capture

PROOF
3
Pillars
Sales/Mkt/HR

PROOF
1.1.1
Version
30 Dec 2024

PROOF
1
Archive
23 Jul 2026

CONTRIBUTION BOUNDARY

Archive store page is public evidence. Staffing and IP ownership are not on that page.

VERIFICATION AND COMPLIANCE

Verify Live Availability Before Customer Demos

Because evidence is archive-backed, confirm the listing and login path before sales calls.

PRE-PUBLICATION VERIFICATION

01
Check live store
Confirm bbogfailgecdbikllcnbdldlkdneolen still installs.

02
Fallback archive
Use Wayback capture for screenshots if needed.

03
Trace one sales tool
Connection or ice-breaker.

04
Show bulk project
If account allows.

05
Privacy check
Auth data declaration.

06
Authorship file
Confirm demo rights.

MEASURES WORTH PUBLISHING

- Install success from live store vs archive-only demos
- Time to first generated message on LinkedIn
- Bulk project completion without error
- Crash-free sessions on the capture version family

GOVERNANCE PRIORITY

Publish performance claims only after live verification and written permission. Prefer archive attribution when the live page is down.

MEDIUSWARE

Build LinkedIn AI Extensions That Bulk-Run Real Jobs

Klevere shows how a Chrome AI toolbox with sales, marketing, and HR tools, plus bulk projects, makes a stronger demo than generic ChatGPT screenshots, even when evidence is archive-backed.

WHAT THE PROJECT DEMONSTRATES

01
Name LinkedIn jobs
Sales, marketing, HR.

02
Bulk projects
Scale path.

03
Archive honesty
Wayback evidence.

04
OpenAI posture
Portfolio tags.

05
Bound multipliers
No fake 100X KPIs.

06
Verify live first
Before customer calls.

07
MV3 delivery
Extension stack.

08
Scope file
Authorship.
